

# POWER UP YOUR BUSINESS WITH NEW DESKTOPS

## High-performing 6<sup>th</sup> generation Intel® Core™ processors power today's business-class All-in-Ones, towers, and mini PCs

Looking for ways to do more with less? Now's the time to take advantage of innovative desktop PCs that can help grow your business. Choose from expandable towers or stylish, clutter-free All-in-One PCs. Or, go even smaller with powerful mini PCs in a compact design built for business. Get the right device to maximize your desktop productivity for a better way to work.

## ARE NEW DESKTOP DEVICES RIGHT FOR YOUR BUSINESS?

### Are you ready for more productivity and collaboration?

**CONSIDER:** New desktop PCs powered by 6<sup>th</sup> generation Intel® Core™ processors are 60% more productive,<sup>1</sup> with cutting-edge performance for responsive multitasking and high-resolution touch-screen capabilities—all in a power-efficient design.

### Would you like to simplify the PC user experience?

**CONSIDER:** Running Windows® 10, you can manage fewer passwords with True Key™ technology, and simplify log-ins with facial recognition technology using an Intel® RealSense™ 3D camera and Windows Hello.

### Can business desktop PCs keep business safe?

**CONSIDER:** Desktops powered by 6<sup>th</sup> gen Intel Core processors feature hardware-enhanced security to help protect identities, data, and devices so that you can work with greater peace of mind.<sup>2</sup>

### Can a new mini PC help deliver a stunning presentation?

**CONSIDER:** You can wirelessly connect to monitors and keyboards using Intel® Wireless Docking and present your content in a conference room without the hassle of cables or adapters using Intel® Wireless Display.

### Are you still running Windows® XP?

**CONSIDER:** It really is time to experience the best of Windows® 10 Pro for your business with a new desktop PC based on the 6<sup>th</sup> gen Intel Core processor, and step up to the latest business-class performance and security.

## A Better Way to Work

Get the performance and security you need to move your business forward with new desktop PCs powered by Intel® processors. They're more affordable than you think.

<sup>1</sup> Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more complete information visit <http://www.intel.com/performance>. Systems Measured: 6th Gen: Intel Reference Board with Intel® Core™ i5-6200U, Memory: 2x4GB DDR4-2133, Intel SSD, 42 WHr battery. Five-year-old system: Acer Aspire™ 1830T, Intel® Core™ i5 520UM, Memory: 4 GB DDR3 1600 MHz, 500GB HDD, 63 WHr battery. An Intel Reference Platform is an example new system. Products available from systems manufacturers will not be identical in design, and performance will vary.

<sup>2</sup> No computer system can provide absolute security.

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Performance varies depending on system configuration. No computer system can be absolutely secure. Check with your system manufacturer or retailer or learn more at [intel.com](http://intel.com).
