MSI AP16
Portable All-in-One PC

The thin and light system design with smart-tilt stand and 10-point multi-touch capability enables new computing experiences. The built-in battery supports moving your PC to different environments without powering it down.

ADAPTABLE

Adapt the way compute capability is delivered securely to a wide range of environments with touch interaction, voice capability, and flexible mounting options.

INNOVATIVE

Compute innovation that brings style to the surrounding environment without compromising system features or performance.

VERSATILE

Enjoy engaging, responsive interaction with 10-point multi-touch and a compute experience as versatile as the compact, innovative system design.
