

Ensure Ed-Tech Success and Unlock your Students' full Potential

Intel® Education's K-12 Blueprint website gives you the latest tools, research data, device information, best practices, funding models, deployment strategies, and success stories demonstrating real-world results in districts just like yours.

More Engaging. More Interactive. More Effective.

This continually updated website offers incredible resources for today's education leaders, such as:

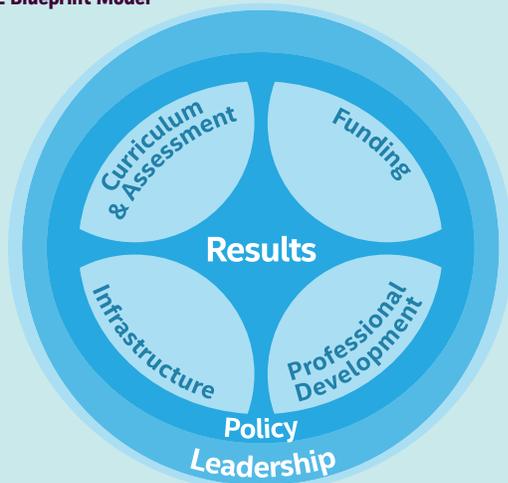

- The latest blog posts from education technology innovators
- Robust toolkits loaded with step-by-steps, program frameworks, forms, presentations, and much more
- Personalized learning resources and a free companion facilitation guide to *Personalized Learning: A Guide for Engaging Students with Technology*, sponsored by Intel® Education and ISTE*

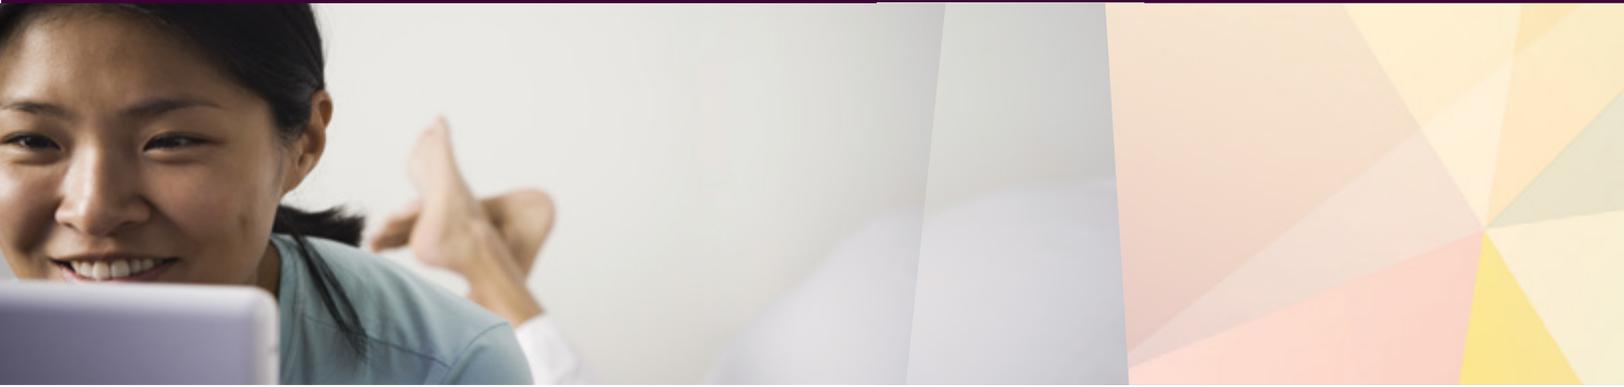

To help educators keep pace with current educational practices, the K-12 Blueprint provides adaptable toolkits each focused on a critical challenge:

- Planning and implementing a BYOD (Bring Your Own Device) program at the school or district level
- Starting a professional learning community at the school or district level
- Adapting your curriculum and assessment methods to address Common Core State Standards
- Planning a pilot/proof of concept to test an education technology program
- Exploring active learning spaces options to better engage students, leverage technology and explore varied educational strategies
- Crafting a comprehensive and actionable plan to secure funding for technology initiatives

K-12 Blueprint Model

Build a Brighter Future for Students

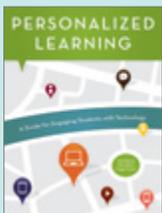

Whether incorporating personalized learning techniques, rethinking assessment, revamping your curriculum to include digital textbooks, or embarking on any technology-supported education initiative, the K-12 Blueprint can help.

Discover the critical resources and information you need to bring next-generation learning to your school or district.

www.k12blueprint.com

“The K-12 Blueprint is a succinct yet in-depth collection of the essential factors for successfully initiating robust education technologies in schools. It is a high quality guide for whatever point you find yourself in the development/implementation process.”

- Leslie Wilson, CEO, One-to-One Institute
