Intel® Development Toolkit for Data Gateways
Out of Box Guide

November 2013
INFORMATION IN THIS DOCUMENT IS PROVIDED IN CONNECTION WITH INTEL PRODUCTS. NO LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE, TO ANY INTELLECTUAL PROPERTY RIGHTS IS GRANTED BY THIS DOCUMENT. EXCEPT AS PROVIDED IN INTEL'S TERMS AND CONDITIONS OF SALE FOR SUCH PRODUCTS, INTEL ASSUMES NO LIABILITY WHATSOEVER AND INTEL DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY, RELATING TO SALE AND/OR USE OF INTEL PRODUCTS INCLUDING LIABILITY OR WARRANTIES RELATING TO FITNESS FOR A PARTICULAR PURPOSE, MERCHANTABILITY, OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.

A "Mission Critical Application" is any application in which failure of the Intel Product could result, directly or indirectly, in personal injury or death. SHOULD YOU PURCHASE OR USE INTEL'S PRODUCTS FOR ANY SUCH MISSION CRITICAL APPLICATION, YOU SHALL INDEMNIFY AND HOLD INTEL AND ITS SUBSIDIARIES, SUBCONTRACTORS AND AFFILIATES, AND THE DIRECTORS, OFFICERS, AND EMPLOYEES OF EACH, HARMLESS AGAINST ALL CLAIMS COSTS, DAMAGES, AND EXPENSES AND REASONABLE ATTORNEYS' FEES ARISING OUT OF, DIRECTLY OR INDIRECTLY, ANY CLAIM OF PRODUCT LIABILITY, PERSONAL INJURY, OR DEATH ARISING IN ANY WAY OUT OF SUCH MISSION CRITICAL APPLICATION, WHETHER OR NOT INTEL OR ITS SUBCONTRACTOR WAS NEGLIGENT IN THE DESIGN, MANUFACTURE, OR WARNING OF THE INTEL PRODUCT OR ANY OF ITS PARTS.

Intel may make changes to specifications and product descriptions at any time, without notice. Designers must not rely on the absence or characteristics of any features or instructions marked "reserved" or "undefined". Intel reserves these for future definition and shall have no responsibility whatsoever for conflicts or incompatibilities arising from future changes to them. The information here is subject to change without notice. Do not finalize a design with this information.

The products described in this document may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

Contact your local Intel sales office or your distributor to obtain the latest specifications and before placing your product order. Copies of documents which have an order number and are referenced in this document, or other Intel literature, may be obtained by calling 1-800-548-4725, or go to: http://www.intel.com/design/literature.htm

Introduction

This guide is for smart services developers who are responsible for using the Intel® Development Toolkit for Data Gateways. The guide will explain how to quickly get the hardware set up and the software installed and running.

Product Documentation

For product information, please refer to the following documents:

- Out of Box Guide (this manual)

- User Manual: This document has further details regarding hardware usage and software installation.

- Wind River Intelligent Device Platform XT Programmers Guide: This document has instructions for using the Wind River Intelligent Device Platform XT* software that is included with this kit. This document is available on the host development PC after installation of the software.

- Kontron M2M Smart Services System Warranty, Safety, and Regulatory Information. This pamphlet is included in the kit. It contains safety and regulatory information for the Kontron M2M System* hardware that is a part of the kit.

The latest versions of all documents are available for download from the product’s website at http://www.intel.com/datagatewaydevkit

Safety Information

Warning

This product has been designed for service development purposes. Although this product has already been approved by several agencies, compliance with your local regional rules may require additional EMC compliance testing.

Before working with this kit, pay close attention to the safety instructions provided in this Out of Box Guide and in the Kontron M2M Smart Services System Warranty, Safety, and Regulatory Information pamphlet. It is highly recommended that you follow exactly the assembly instructions detailed in this guide to ensure and maintain compliance with existing product certifications and approvals.

Use only the described, regulated components noted in this guide. Use of other non-approved products or components will void the UL listing and result in non-compliance with product regulations in the regions where this product is sold.
This is a Federal Communications Commission (FCC) Class B device. See the Kontron M2M Smart Services System Warranty, Safety and Regulatory Information pamphlet included in this kit for complete safety and certification information.

**Kit Contents**

The Intel® Development Toolkit for Data Gateways includes the following:

- One Kontron M2M System.
  
  **Note:** The system is manufactured by Kontron, and comes preloaded with a Wind River Intelligent Device Platform XT 1.0 system image.

- One USB flash drive with Wind River Intelligent Device Platform XT 1.0 installation software.
- One power adapter with U.S. and European power cords
- Two 802.11/802.15.4 antennas
- Two 3G antennas with adapters
- Two Micro USB to USB adapter cables
- One Micro HDMI to HDMI adapter cable

**Out of the Box Expectations**

The Kontron M2M System is a standalone controller. Firmware development for the controller is supported by a Linux® version of the Wind River Intelligent Device Platform XT 1.0 environment, running on an external Development Host PC. Out of the box, the Kontron M2M System will boot and run the Wind River Intelligent Device Platform software.

The USB flash drive contains Wind River Intelligent Device Platform XT 1.0 software with a complete set of development tools that can be installed. These tools may be used to modify or rebuild the default Kontron M2M System firmware.
Development Toolkit Contents

The pictures below show the kit contents and their packaging.

Remove tray by lifting using round hole

Unpack items

Kontron M2M System

USB Flash Drive

Power Supply

Power Cords:
- 1x North America
- 1x Continental Europe

Antennas
- Two 2.4 GHz antennas for 802.11 or 802.15 use
- Two 3G antennas

Tray

This Out-of-Box Guide
Ports and Antennas

Refer to the figures below for locations of ports and antenna connections.

2.4 GHz Antenna Connectors: Screw antennas in to install

3G Antenna Connectors: Screw antennas in to install

2.4 GHz Antenna Connector (for 802.15.4 communications)

Micro SD Port

Micro USB Port

3G Antenna Connector

Headphone / Live Out

Microphone

2x HDMI Ports
(The primary MicroHDMI port is near the MicroUSB port and the one closest to the antenna connector is the secondary MicroHDMI port)

4x Mounting Holes
Cautions:

1. The Kontron M2M System does not support USB OTG (On-The-Go) operation.

2. There is a small slide switch near the Micro USB Port to enable and disable 5V power to the Micro USB Port. A nearby LED is green if 5V is enabled and amber if 5V is disabled.
System Setup

The following diagram depicts the development environment setup for using the Intelligent Device Platform software included with this kit.

Only the power cables for the Intel Kontron M2M System are included in the kit. Cables needed to connect and power the router, monitors, USB hub, PC, keyboards and mice are not included.

Following the diagram:

1. Connect an Ethernet cable between your Development Host and the router.
2. Connect an Ethernet cable between your Kontron M2M System and the router.
3. Connect the router to your network (WAN).
4. Connect a USB keyboard to the Kontron M2M System.
5. Connect the top micro HDMI output of the Kontron M2M System to an HDMI monitor using the included micro HDMI cable.
The USB flash drive contains the Intelligent Device Platform installer, which includes the Intelligent Device Platform XT 1.0, Wind River Linux, the Wind River Workbench Development Suite*, and a board support package for the Kontron M2M System. See the Software Tools Installation section below for instructions on how to install the software on a Development Host system.

**Connecting to the Kontron M2M System via Ethernet**

The steps in this section should be followed to connect a development host PC to the Kontron M2M System to verify that it is functional.

1. Connect the Development Host PC as illustrated in the System Setup section above. (Ethernet cables are not included in the kit.)

2. Power on the Kontron M2M System by attaching the power supply and cord to the system and plugging the system in. There is no on/off button.

3. Exit the Kontron M2M System default Demos screen and enter a login shell by typing "Ctrl+Alt+F2".

4. At the login prompt enter "root" for the login name

5. At the password prompt enter "root" for the password

6. At the input prompt type "ifconfig eth0 172.31.255.1" then press Enter

7. At the input prompt type "ifconfig eth0" then press Enter
   The display should show eth0 settings as follows:
   inet addr:172.31.255.1  Bcast:172.31.255.255  Mask:255.255.0.0

8. Configure the Development Host PC running Linux to a static IP address of: 172.31.255.254
   This can be done using the ifconfig commands shown above. Be sure to specify the correct Ethernet port, as it may not be eth0 for your development host PC.

9. On the Development Host PC running Linux, run the following:
   
   ```bash
   ssh -l root 172.31.255.1
   ```
   When asked, enter the following for both the user name and password: root

   At this point, the user should be logged into the Kontron M2M System.

For further information, please refer to the Intel® Development Toolkit for Data Gateways User Manual included in this kit, and the Wind River Intelligent Device Platform XT Programmer's Guide. The programmer's guide

**Web Interface for Wireless Network Management**

A web management interface (WebIF) utility is pre-installed on the Kontron M2M System in order to simplify provisioning of the system. Among other things, it allows configuration and management of the following interfaces:

- IP and Network interface
- Wi-Fi* connection
- 3G Mobile connection
- ZigBee* connection
  - This provides basic functionality to start ZigBee as a coordinator and search for devices to pair to.

WebIF can be reached via any browser (for example, Mozilla* or Chrome*), and from any PC or workstation that has a LAN (via the Ethernet port) or Wi-Fi connection to the system. Access to WebIF is not available via the 3G port.

WebIF defaults to the static IP address (192.168.1.1). If you connect via Wi-Fi, the system will provide you (via DHCP) with a suitable IP address. If you are connecting via Ethernet, you will need to configure your Ethernet address appropriately (for example, use 192.168.1.2, netmask 255.255.255.0). Once connected, you can configure the system’s interfaces as appropriate.

The WebIF user name and password both default to **admin**. You should change this as soon as possible.
Software Tools Installation

Follow these steps to install the Wind River Intelligent Device Platform Software included in this kit onto a Development Host PC.

Before installing the Wind River Intelligent Device Platform software, please refer to the Wind River Linux Release Notes, System Requirements section for supported development host Linux versions and for development host hardware and software requirements for each of those supported versions. The Wind River Linux Release Notes can be found on the Development Toolkit website at http://www.intel.com/datagatewaydevkit.

The activation code below is for a 30-day temporary license. To obtain a permanent license the developer must register at http://www.intel.com/datagatewaydevkit.

Note: You will need Internet access to install this product.

1. To install, insert the Wind River Intelligent Device Platform XT Software USB flash drive and run the setup file located at the root of the USB:

   For example, for Linux O.S. run: ./setup_linux

2. Follow the on-screen installation instructions as follows:

   a) At the "Online update settings" screen, accept all items that are selected by default.

   b) When asked to choose an Activation Type, select Temporary activation.

   c) When asked for a License Authorization Code (LAC), enter: 676023-N3QQ-IPCLS, or your permanent license code if available.

   d) At the Choose Installation Filters screen, Intel is selected by default.

   e) At the Select Products screen, expand the list to see the components to be installed.

   f) Install all products and features that are selected by default.

3. Launch the product.
Certifications

The following certifications apply to the Kontron M2M System, which is manufactured by Kontron.

For further information, refer to the Kontron M2M Smart Services System Warranty, Safety, and Regulatory Information pamphlet included in this kit.
