Are Your Tablets Enterprise-Ready?

intel
Look Inside.™

Today's on-the-go workers rely on mobile devices to boost productivity. Consider the following when evaluating Intel® based tablets for your organization:

✓ Is this tablet responsive and secure? In other words, business-grade?

CONSIDER: Tablets with Intel Inside® offer built-in security features[1] and performance capabilities. Built with your mobile workforce in mind, Intel based tablets help enable on-the-go productivity.

✓ What software can it run?

CONSIDER: The latest Intel based tablets offer freedom of operating system choice. Choose a tablet running either Windows* 8 or Android* with great productivity applications that fit your unique preferences.

✓ Does this tablet have the size and functionality we need?

CONSIDER: Intel based tablets are available from a variety of OEMs with sizes ranging from 7 to 10 inches. You're sure to find a tablet with the features and capabilities your workforce needs.

✓ Can a tablet be used for different business tasks?

CONSIDER: Intel based tablets can be used in a number of different business use cases: as a companion device for your PC, as an ultra mobile device for tasks that require utmost portability, and as a paper replacement device for key verticals.

Look for Intel Inside when choosing a tablet with business-class performance and built-in security features[1] for your enterprise.
