# Enterprise-Ready Tablets with Intel Inside®

**intel**
**Look Inside.™**

**Today's mobile workforce relies on new 64-bit ready mobile devices to boost productivity. Consider the following when evaluating Intel® based tablets with Android\* for your organization:**
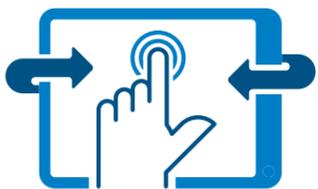

## ☑ Is this tablet responsive and secure? In other words, business-grade?

**CONSIDER:** Built with Intel Inside®, Intel based tablets with Android offer built-in security features,[1] power efficiency and great performance when running popular productivity software. With Intel silicon inside, these tablets help enable great productivity by letting business users read, edit and print emails and Microsoft Office\* documents when on-the-go. Plus, Intel based tablets are 64-bit ready, so you can achieve improved performance in the future with apps enabled for this technology.

## ☑ How does the Android OS enhance functionality and performance for key applications and web-based tasks?

**CONSIDER:** Access a wide range of popular productivity applications and get ready for a future of improved application performance with 64-bit capable Intel based tablets.

## ☑ Does this tablet have the size and functionality we need?

**CONSIDER:** Intel based tablets are available from a variety of OEMs with sizes ranging from 7 to 10 inches. You're sure to find an Android tablet with the features and capabilities your workforce needs.

## ☑ Can a tablet be used for different business tasks?

**CONSIDER:** Intel based tablets can be used in a number of different business use cases: as a companion device for your PC, as an ultra mobile device for tasks that require utmost portability, and as a paper replacement device for key verticals.

**Look for Intel Inside when choosing a tablet that's ready for business.**
