**End-Of-Life Notice: InfiniBand DDR Switches**

Dear QLogic® Customer,

Due to the market transition to QDR and limited availability of supply, QLogic is announcing End-of-Life (EOL) for the InfiniBand DDR switch product family. Our full QDR switch product family is available as the replacement.

Currently we have a fixed amount of inventory remaining for the DDR product that will be available until depleted on a first-come, first-served basis. Current estimates project we will have product available through roughly March 2011, however, that availability will depend on demand over the next few months.
