# Power-Optimized Premium Notebook Chipset for Consumer and Business

Mobile Intel® 7 Series QS77 Express Chipset and 3rd Generation Intel® Core™ Processors

With the most power-optimized, industry-leading performance and responsiveness, the Intel® QS77 Express Chipsets and 3rd generation Intel® Core™ vPro™ processor family delivers improved manageability and security for your most demanding consumer and business notebooks.

## Enhanced Manageability and Security

With enhanced hardware-based Keyboard, Video, and Mouse (KVM) Remote Control,<sup>1</sup> IT administrators can now manage clients across multiple screens. Combined with secure data access via Intel® Identity Protection Technology (Intel® IPT),<sup>2</sup> the Intel® QS77 Express Chipsets help your business stay secure in the digital world.

## Smarter Performance

The combination of the Intel® QS77 Express Chipset and 3rd generation Intel® Core™ processors delivers incredible notebook experience. You'll get maximum power for whatever you do, thanks to the combination of smart features like Intel® Turbo Boost Technology 2.0<sup>1</sup> and Intel® Hyper-Threading Technology,<sup>2</sup> which together activate full processing power exactly where and when you need it.

## Increased Responsiveness

Intel® Smart Connect Technology<sup>3</sup> enables instant access to your data by allowing your content to be refreshed in the standby power state—all while minimizing power consumption. In addition to faster boot and resume times, Intel® Rapid Start Technology<sup>4</sup> provides energy efficiency without sacrificing user experience. While providing SSD-like performance

and large HDD capacity at lower costs, the Mobile Intel® 7 Series QS77 Express Chipset features Intel® Smart Response Technology<sup>5</sup> that boots up your notebook faster and delivers faster application loading for the most demanding enthusiast users.

## Power Optimized and Long Battery Life

Mobile Intel® 7 Series QS77 Express Chipset is smallest, power optimized mobile chipset<sup>12</sup>, enabling ultra-thin and light notebook with stylish look and great mobility. Mobile Intel® 7 Series QS77 Express Chipset consumes lower power which results in longer battery life<sup>12</sup>, enabling users longer time away from recharging battery.

## Enrich Your IT Environment

Intelligent, hardware-assisted security management features help you quickly deploy security patches across PCs, preventing unauthorized disabling of installed security software. Not only can data encryption run up to four times faster due to Intel® Advanced Encryption Standard-New Instructions<sup>8</sup> (Intel® AES-NI), but you can remotely unlock encrypted drives that require pre-boot authentication and manage data security settings, even when the PC is off. You can also help protect your

organization's sensitive data with optional Intel® Anti-Theft Technology.<sup>9</sup> When enabled, your Intel Core vPro processor-based PCs can be automatically and remotely disabled if they're lost or stolen. Once recovered, they can be reactivated to full functionality.

Protect your passwords and other credentials with Intel Identity Protection Technology. Intel IPT ensures your passwords are safe by presenting a PAVP-protected window for password authentication. With the use of the Public Key Infrastructure embedded in the platform, signing into your system and application is simpler and secure.

Remote management capabilities make PC upkeep easier and more cost effective, enabling you to keep your PCs running smoothly, without taking them out of the hands of users. Once activated, Intel® vPro™ Technology<sup>10</sup> allows you to remotely configure, diagnose, isolate, and repair an infected PC – even if it's unresponsive.

Hardware-based KVM Remote Control (keyboard, video, mouse) lets you fix more issues remotely by seeing what your users see with greater resolution than ever before. To reach you, users can even “call for help” through a wired or wireless protected tunnel to request assistance in managing or repairing their PC. For better manageability, users can also use their mouse across multiple client monitors.

### **Intel® Stable Image Platform Program**

Reducing the variety of supported hardware platforms greatly simplifies enterprise PC management, which in turn lowers total cost of ownership. One critical element in reducing PC hardware variation involves deploying standardized PC configurations. The Intel® Stable Image Platform Program<sup>15</sup> (Intel® SIPP) can help your company identify and deploy standardized, stable image PC platforms for at least 15 months. The Intel QS77 Express Chipsets support Intel SIPP.

### **Enhanced Security and Productivity with Intel® Small Business Advantage**

With the Mobile Intel® 7 Series QS77 Express Chipset and 3rd generation Intel® Core™ processor family, small businesses are now enabled with Intel® Small Business Advantage (Intel® SBA), which has built-in IT support.<sup>1</sup> Once configured, this state-of-the-art technology continually monitors your security software and alerts you if it's been compromised by viruses or malware. It will automatically back-up your company's data and manage routine maintenance tasks like running software updates, defragging disk drives and deleting cookies and temporary Internet files after hours, so your employees won't be interrupted.<sup>3</sup> PCs can also be configured to power on or off in set times in order to provide your small business with increased energy savings.

### **Unlocked Flexibility and Freedom**

The Mobile Intel® 7 Series QS77 Express Chipset enables the performance tuning features of unlocked Intel Core processors, allowing the user to change the core multiplier to increase frequencies without having to run any other part of the system above specifications. Get the ultimate system performance with the flexibility to set your system specs just the way you like.

### **Improved Built-In Visuals**

With smart performance and built-in 3D visual and graphics support, the 3rd generation Intel Core processor family will add a new dimension to your notebook experience.<sup>6</sup> Intel® Quick Sync Video technology, our built-in hardware acceleration technology in all 3rd generation Intel Core processors, delivers astonishing video transcoding performance, enabling your notebook to edit, burn, and share your content faster—without the need for add-in hardware. InTru™ 3D Technology<sup>7</sup> delivers 3D movie playback without hesitation or interruption. The Mobile Intel® 7 Series QS77 Express Chipset and 3rd generation Intel Core processors

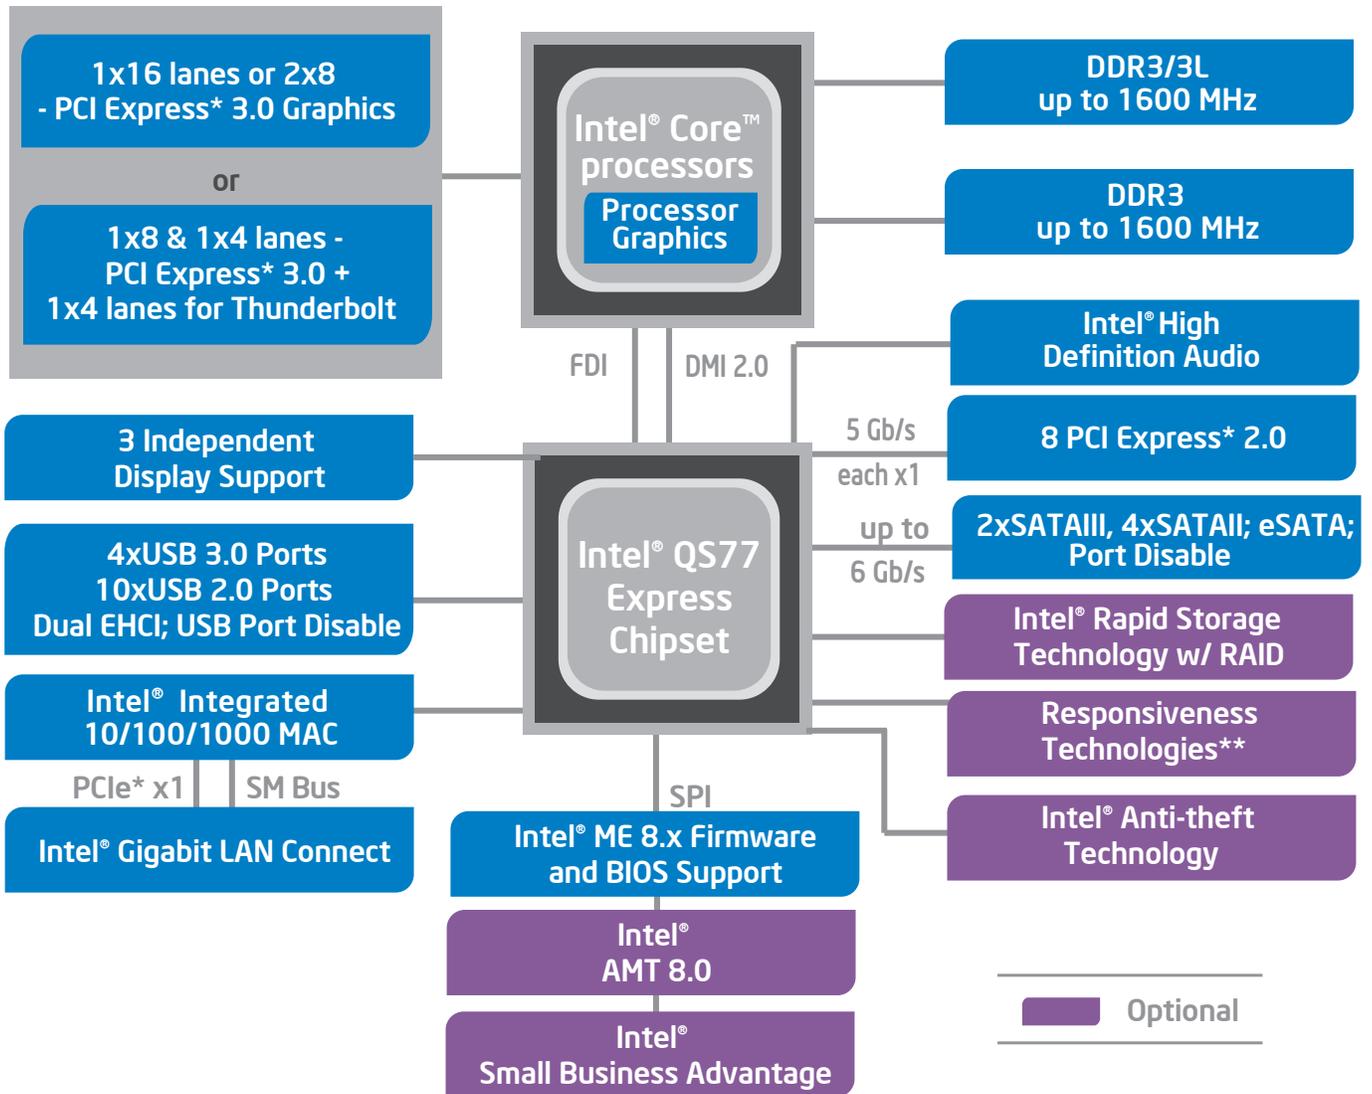

now come with built-in Intel® Wireless Display (Intel® WiDi),<sup>8</sup> allowing users to view content from their desktop notebook to an Intel® WiDi-enabled TV screen. The Mobile Intel® 7 Series QS77 Express Chipset also supports up to three displays.<sup>9</sup>

### **The Mobile Intel® 7 Series QS77 Express Chipset delivers the latest platform features for superb system performance with the latest I/O technologies**

The Mobile Intel® 7 Series QS77 Express Chipset integrates several capabilities to provide flexibility for connecting I/O devices. Integrated USB 3.0 support helps you connect faster to your digital life. The latest Intel® Rapid Storage Technology<sup>10</sup> enables the full Serial ATA (SATA) interface speed of up to 6 Gb/s to support next-generation Solid State Drives (SSDs) and traditional Hard Disk Drives (HDDs). In addition, the Mobile Intel® 7 Series QS77 Express Chipset drives lower power through enhanced link power management of the Advanced Host Controller Interface (AHCI), enable easier expandability with support for native hot plug, and enhance boot and multitasking performance with Native Command Queuing (NCQ).

Intel® Rapid Recover Technology (part of the Intel Rapid Storage Technology suite) provides a fast, easy-to-use method for the end user to recover their data and return their system to an operational status.
