## Intel® Node Manager Enabled Server Platforms Availability Matrix

August 6<sup>th</sup> , 2015 Published by Intel DCG Marketing

Intel Node Manager is a critical component of data center power management and data center efficiency strategies. It provides individual server level power reporting and capping functionality, helping IT administrators to better understand power usage in their infrastructure, to characterize power usage profiles by server type and configuration and to statically or dynamically cap server power to improve data center operating costs and compute resource availability. In addition to reporting power consumption, the new Node Manager can be used to monitor temperature and resource utilization.

For more information on how Intel Node Manager works, and the related use cases, please see: <a href="https://communities.intel.com/docs/DOC-6179"><u>www.intel.com/go/nodemanager</u></a> and <a href="https://communities.intel.com/docs/DOC-6179"><u>https://communities.intel.com/docs/DOC-6179</u></a>.

For more information on how Intel Node Manager is used as part of cloud security solutions, please visit the Intel® Cloud Builder reference architectures site:

http://www.intel.com/itcenter/topics/cloud/cloudbuilders/referencearchitecture.htm

Not all servers support Intel Node Manager. Intel Node Manager requires multiple hardware and software components, including:

- Processor, Chipset, Node Manager Firmware, SPI Flash
- Enabled BIOS, Enabled BMC, ACPI Compliant Operating system\*
- For a complete list of requirements, consult the appropriate Platform Design Guidelines documentation that is available to an OEM or ODM that supports Node Manager Technology on one or more of their platforms.

The matrix below is intended to provide an easy reference for the IT administrator to determine which platforms and operating environments support Intel Node Manager. This list is not an exhaustive list. This list will be updated as vendors complete testing and release products that support Intel Node Manager.

\*Not all Operating Systems that are ACPI compliant are supported. Contact the OEM or ODM vendor of your choice for details on Operating Systems that are supported by their platforms.

Intel Node Manager Ready Marketing Matrix			
The following server platform components have announced support and platform availability for Intel			
Node Manager Technology
