## Intel Joins Chicago Climate Exchange®

April 10, 2007 – Intel (NASDAQ: INTC) Corporation reaffirmed its decade-long commitment to reduce its climate change emissions by joining the Chicago Climate Exchange (CCX®). CCX is the world’s first and North America’s only voluntary, legally binding greenhouse gas emissions reduction, registry and trading program. By joining CCX, Intel has committed to cut its greenhouse gas emissions in the United States by a minimum of 6 percent in absolute terms by 2010.

“At Intel, we are proactively working to reduce our carbon footprint,” said Todd Brady, Intel’s Corporate Environmental Manager. “We believe participation in CCX provides us with an opportunity to continue to improve our climate change programs and to demonstrate that market-based emissions trading programs can provide flexible and cost effective solutions.”

“Intel is a leader in its field and in understanding the strategic value of environmental investment. The Intel brand is synonymous with innovation in the semiconductor industry worldwide, and we welcome their proactive thinking on the issue of climate change as demonstrated by their membership in CCX,” said CCX Chairman and CEO Dr. Richard L. Sandor. “Intel’s leadership is also reflected in their innovative and comprehensive greenhouse gas emissions management thus far and their expertise will enrich CCX and advance the urgent cause of climate change mitigation worldwide.”

Intel worked with the EPA to develop the original Energy Star standard for computers, and helped develop a worldwide industry agreement to reduce emissions of PFCs, believed to be the first voluntary initiative in the world to limit climate change impact. Intel was one of the first companies to participate in the U.S. EPA’s Project XL which was an innovative program to streamline environmental permitting requirement while simultaneously improving overall environmental performance

**About Intel** – Intel, the world leader in silicon innovation, develops technologies, products and initiatives to continually advance how people work and live. Additional information about Intel is available at [www.intel.com/pressroom](http://www.intel.com/pressroom). For more information about Intel’s corporate responsibility initiatives, please see [www.intel.com/go/responsibility](http://www.intel.com/go/responsibility).

**About Chicago Climate Exchange, Inc.** - CCX is the world’s first and North America’s only legally binding rules-based greenhouse gas emissions allowance trading system, as well as the world’s only global system for emissions trading based on all six greenhouse gases. CCX members are leaders in greenhouse gas management and represent all sectors of the global economy, as well as public sector innovators.

Reductions achieved through CCX are the only reductions in North America being achieved through a legally binding compliance regime, providing independent third party verification

provided by NASD and price transparency. The Chairman and CEO of CCX is economist and financial innovator Dr. Richard L. Sandor, who was named a Hero of the Planet by Time magazine for his work in founding CCX. For a full list of CCX members, daily prices and other program information, see [www.chicagoclimateexchange.com](http://www.chicagoclimateexchange.com). CCX is a wholly owned subsidiary of Climate Exchange Plc, a public stock company listed on the AIM Market of the London Stock Exchange. Climate Exchange Plc also owns the European Climate Exchange, Europe's leading CO<sub>2</sub> emissions exchange.
