## **Preface**

### **Introduction to Achievable Enterprise Security**

- Why Can't Distributed Systems Be Secured Completely?
- What is Achievable Security?
- What is ESP?
- Using Today's Technology and Planning for Tomorrow
- Ensuring the Success of ESP Projects

### **Chapter 1 Prepare the enterprise for security**

- The Enterprise Security Charter
- Building The Security Organization
- Marketing The Mission within The Enterprise

### **Chapter 2 Organize Security by Resource and Domains**

- Identifying Resources
- Grouping Resources into Security Domains

### **Chapter 3 Complete the Baseline Security Analysis**

- Choosing a Policy Model
- Researching Existing Policies
- Creating the Functional Assessment of Security
- Reducing the Scope of The Projects

### **Chapter 4 Complete Requirements**

- Identifying Security Requirements
- Categories of Requirements
- Trust Modeling

### **Chapter 5 Identify Gaps and Prioritize Needs**

- Analyzing Gaps
- Prioritizing Projects

### **Chapter 6 Selecting and Planning the Projects**

- Determining The Security Strategy
- Shortening the List of Projects
- Selecting Projects
- Planning the Projects
- Sourcing the Projects
- Selecting the Security Products
- Marketing the Projects
- What Is Next?

### **Chapter 7 Modifying ESP**

- Modifying The Baseline Steps
- Pass 1
- Pass 2
- Pass 3
- Pass 4
- Integrating ESP Into The Ongoing Security Program

## **Chapter 8 Formulating a Technology Strategy**

- Analyzing Technology Maturation
- Projecting Demand Curves
- Assessing Adoption Probability

## **Chapter 9 Security Technologies**

- Enforcement Security Technologies
- Access Control
- Support Security Technologies
- Technology Integration

## **Chapter 10 Two Case Histories**

- Meet Y Company
- Z Company : A Federated Model

## **Chapter 11 Security Follow-Up Projects**

- Y Company
- Z Company

## **Chapter 12 Single-Point Administration through Role-Based Authorization**

- Introduction
- Single-Point Administration through Role-Based Authorization

## **Chapter 13 Single Sign-On**

- The Security Fabric: Integrating the Tiers
- Product Architectures
- How to Succeed at SSO
- Evaluation Criteria for SSO Products

## **Appendix A Sample Request For Proposal**

## **Appendix B Further Reading**

- Books
- Organizations

## **Glossary**

## **Index**
