World Mural Project Themes Young Minds Peer into the Future

From around the world, kids give us their views into a future after 40 more years of computing, here are some interesting examples:

- From a youth in China reflecting on the recent earthquake in China, a future machine that releases pressures and forces in the earth to prevent quakes. [\[Image\]](#)
- From a student in Ireland, a prediction of wearable computer/communicators. They look like wrist watches connected to pinky rings and thumb rings, which you talk and listen through-the way people currently motion “call me.” [\[Image\]](#)
- A fountain-of-youth drawing dominated by the medical symbol (caduceus) and an arrow pointing from an old face to a young face, with the caption “the best is yet to come.” [\[Image\]](#)
- A student’s muck and dirt-mound landscape with the caption” in 40 years, computers will empower us to keep earth from becoming a landfill.” [\[Image\]](#)
- A student’s predictions that in 40 years with computers, we will be able to teleport back in time, communicate through holograms, and transform our computers into cars. [\[Image\]](#)
- A more personal note from a Massachusetts student that computers will help make them become a doctor, save lives, and invent an artificial leg to help others. [\[Image\]](#)
- From a student in Jordan, a future landscape of flying cars and the words ”finally a cure for cancer.” [\[Image\]](#)
- From a student in India, a mandala of hope with the caption “In 40 years computers will change the world”. [\[Image\]](#)
- From a student in Panama, a drawing of books and happy faces with the caption “In 40 years computers will enable us to eliminate illiteracy in the world.” [\[Image\]](#)
- On Einstein’s portrait, the idea that we will vastly improve our brain power by storing and sharing our thoughts through memory pens we can plug into our brains. [\[Image\]](#)

Below are some of the common themes represented by more than 500 youth and kids who participated in the World Mural Project:

<p>Advance Communication Skills Westside Community Center - Albuquerque, New Mexico Mott Community Center – Fairfax, Virginia Salvation Army Portland, Oregon Dongjiatou School, Dalian, China NW Activities Center Detroit, Michigan Boys and Girls club of Framingham, Framingham, Massachusetts</p>	<p>Space Travel Malaysia Youth Development Association – Ramallah, Palestine Tacoma, Tacoma, Washington Welfare Institute Children’s Place - Shanghai, China</p>
<p>Teletransport, Speed Up Travel Youth Development Center - Albuquerque, New Mexico Tiger Woods Learning Center – Anaheim, California Auckland Computer Clubhouse – Auckland, New Zealand Help New Horizons – New York, New York Willston, Falls Church, Virginia Belfast, Northern Ireland CLT, Bangalore, India</p>	<p>Achieve a Greener Environment Neve Yaakov Community Center - Jerusalem, Israel K.R. Puram Government School, Bangalore, India James Lee Community Center – Falls Church, Virginia</p>
<p>Improve our Memories and Brain Power Grand Street Settlement - New York, New York PAL - Beaverton, Oregon Boys & Girls Club, San Luis Valley - Alamosa, Colorado The Zone, Howard Area Community Center - Chicago, Illinois Malaysia First Tee of Monterey County - Salinas, California</p>	<p>Improved healthcare, Increased lifespan Boston Science Museum – Boston, Massachusetts Amman - Amman, Jordan Williston Community Center – Falls Church, Virginia Lakewood – Lakewood, Washington Longmenshan School - Chengdu, China Sorenson Multicultural Center - Salt Lake City, Utah</p>
<p>Better Education Boston Science Museum – Boston, Massachusetts Parroquia de Fatima – Panama City, Panama</p>	<p>Multi-Function, Wearable Computers Foroige Blanchardstown - Dublin, Ireland Fitzroy Computer Clubhouse, Australia</p>
