

OWS

How to Reset Passwords

Steps for Resetting Passwords:

1 Launch [Intel Technology Provider](#) in your web browser

2 Click on the Enter OWS button to open the log in page

3 Click [Forgot your Password?](#)

4 Enter your **Login ID** and click **Continue**

5 If you would like to have a temporary password sent to you, click **Have it e-mailed**. To create a new password immediately, click **Create a new Password**

Note:

If you create a new password you will need to answer the security question as you did during initial registration

6 If you have chosen **Have it e-mailed**, you will receive a temporary password in your registered e-mail address. Login using your **Login ID** and the temporary password, you will be requested to assign a new permanent password

7 If you have opted for **Create a new password**, you will need to answer the security question and assign yourself a new password. Click **Save** when done

8 Login as normal using your **Login ID** and new password in the future

Forgot Your Password?

Enter your **Login ID** and click **continue**.

If you also forgot your Login ID, [click here](#).

Other login issues? [Click here to contact us for assistance](#).

Create New Password

To create a new password, answer your security question so that we can verify your identity. Then enter and confirm a new password.

If you cannot remember the answer to the question, [Click here to contact us for assistance](#).

Note:

The arrival of notification e-mails might vary based on network performance. If you fail to receive your temporary password after 2 business days, kindly check with the support team.
