In the EU, this symbol means that this product must not be disposed of with household waste. It is your responsibility to bring it to a designated collection point for the recycling of waste electrical and electronic equipment. For more information, please contact your local waste disposal collection center or your point of purchase at this product.

RoHS
Mandatory, because these regulations do not allow the use of certain hazardous materials in electrical and electronic equipment. The regulations include the following substances:
- Lead must be removed from solder.
- Halogenated flame retardants, such as brominated polystyrene and brominated epoxy resins, must be replaced by non-halogenated alternatives.
- Cadmium must be removed from batteries and other electrical and electronic equipment.

PBB
PBB (polybrominated biphenyls) are hazardous substances that are prohibited under RoHS.

PBDE
PBDE (polybrominated diphenyl ethers) are hazardous substances that are prohibited under RoHS.

China RoHS Declaration

Hazardous Substances Table

<table>
<thead>
<tr>
<th>Component Name</th>
<th>Hazardous Substance Category</th>
<th>Limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printed Board Assemblies</td>
<td></td>
<td>X X X</td>
</tr>
</tbody>
</table>

Note: 0 indicates that the hazardous substance is not contained in the component, X indicates that the hazardous substance is contained in the component. The limits for material content are specified in the regulations.

0: This indicates that the hazardous substance is not contained in the component.
X: This indicates that the hazardous substance is contained in the component.

The table shows which substances may be found in the product. It is important to note that these limits do not apply to all products, and the exact contents may vary depending on the specific product.

In the EU, the RoHS directive, WEEE, and other applicable regulations govern the disposal and recycling of electronic waste. It is important to follow these regulations to ensure proper disposal and recycling of electronic waste.

RoHS compliance is mandatory in the EU, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with RoHS regulations.

In China, the RoHS directive is also mandatory, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the Chinese RoHS directive.

In Japan, the Kojin (Japanese) and Koyoy (Korean) versions of the RoHS directive are mandatory, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the Kojin and Koyoy RoHS directives.

In the United States, the RoHS directive is mandatory, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the United States RoHS directive.

In summary, RoHS compliance is mandatory in all major regions and countries, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the relevant RoHS directive.

China RoHS

The China RoHS directive is mandatory in China, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the China RoHS directive.

The China RoHS directive includes specific limits for hazardous substances, such as lead, cadmium, and brominated polystyrene.

In summary, RoHS compliance is mandatory in China, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the China RoHS directive.

In the United States, the China RoHS directive is mandatory, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the China RoHS directive.

In summary, RoHS compliance is mandatory in the United States, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the United States RoHS directive.

In summary, RoHS compliance is mandatory in all major regions and countries, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the relevant RoHS directive.

RoHS compliance is mandatory in the EU, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with RoHS regulations.

RoHS compliance is mandatory in China, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the China RoHS directive.

RoHS compliance is mandatory in the United States, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the United States RoHS directive.

RoHS compliance is mandatory in Japan, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the Japan RoHS directive.

RoHS compliance is mandatory in all major regions and countries, and failure to comply can result in fines and penalties. It is important to ensure that all electronic products are compliant with the relevant RoHS directive.
