

Guide to Create a Windows 7* UEFI Installer Image on a USB Drive

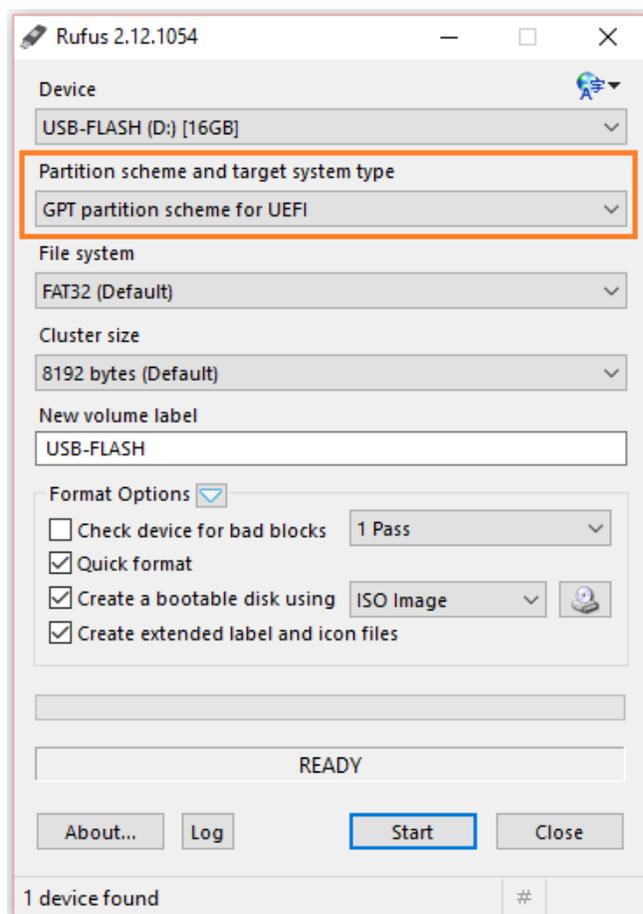

Materials Needed:

- Admin computer (running Windows 7, 8.1 or 10)
- Rufus software, downloaded from <https://rufus.akeo.ie/>
- Windows 7 ISO image (in a folder on the Admin computer or CD/DVD)
- USB flash drive

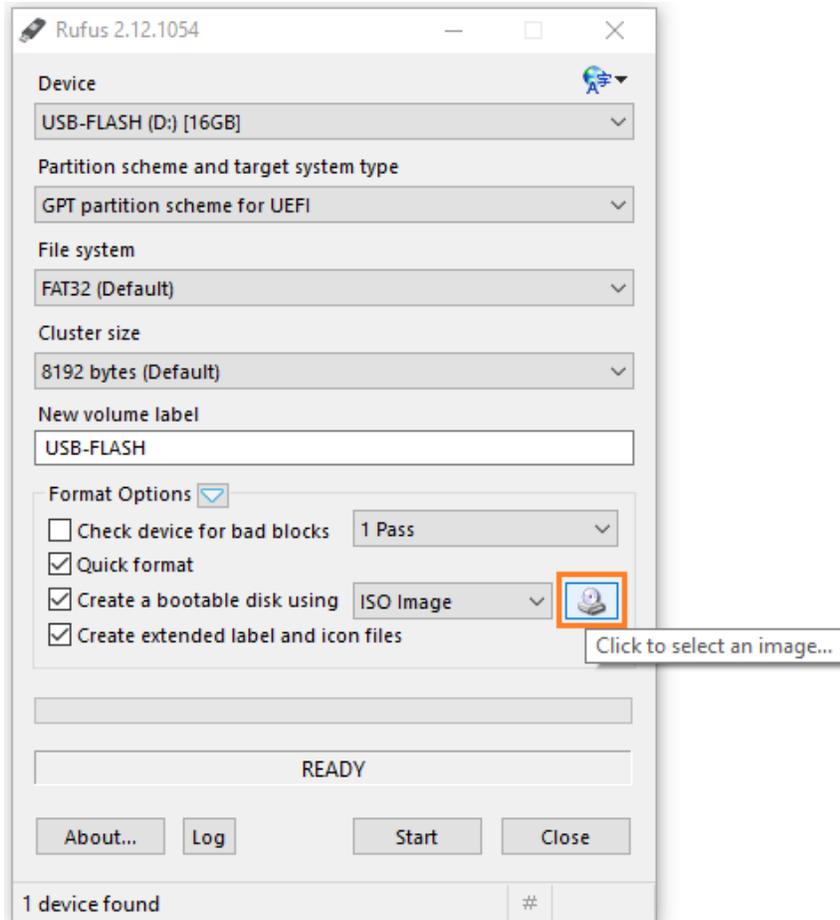

Note: all data on the USB flash drive will be erased during this process. Save all data you want to keep to another device.

Steps to create Windows 7 installer image

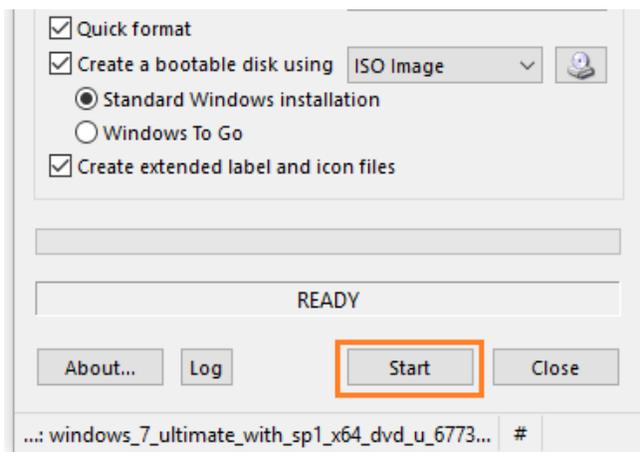

1. Plug the USB flash drive into the computer.
2. Start Rufus.
3. Set the Partition **scheme and target system type** to **GPT partition scheme for UEFI**.

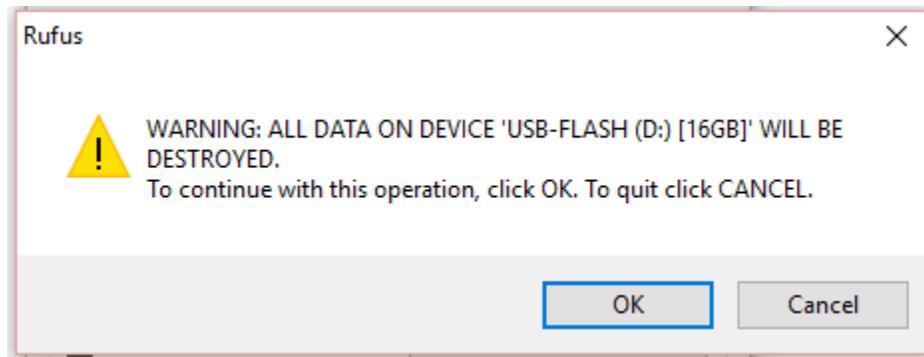

- Click the button next to the **Create a bootable disk using** checkbox. You'll be prompted to search for the ISO image to use.

- Navigate to and select the Windows 7 ISO image.
- Click Start.

7. Click OK on the warning dialog box.

It will take several minutes to complete the image creation process.

8. Close Rufus when complete.

Your Windows 7 installation image can now be used with the [Windows 7 USB 3.0 Creator Utility](#).
