

## HDMI Firmware Update Guide Intel® NUC Kits NUC6CAY, NUC7i3BN, NUC7i5BN, NUC7i7BN

What this update fixes:

- An issue of high bit rate surround sound formats (DTS-HD MA\*, Dolby True- HD\*) not playing with HDMI 2.0 receivers.

<b>Note</b>	<ul style="list-style-type: none"><li>• An HDMI device <b>MUST</b> be plugged into the Intel NUC for the update tool to work.</li><li>• There can only be one video device plugged into the HDMI port and it must be an HDMI 2.0 device.</li></ul>
-------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

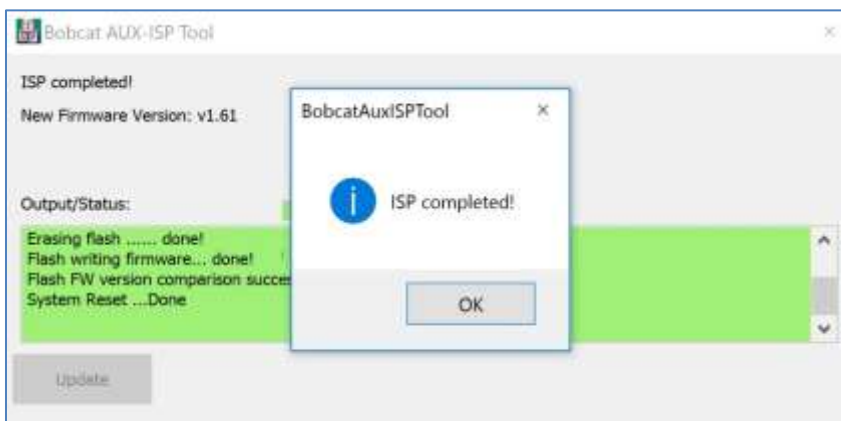

To update the HDMI firmware:

1. Download and unzip the **HDMI\_2.0\_Firmware\_Update\_Tool**.
2. Double-click the file **HDMI\_2.0\_Firmware\_Update.exe** to launch the Update tool.
3. Confirm that the NUC firmware is an older version and needs to be updated.

4. Click the **Update** button.

**NOTE:** The screen will go black for up to a minute. Do NOT turn off the Intel NUC or the monitor until the update is complete.

5. **Click OK** when the update finishes.
  
6. Shut down the Intel NUC and then turn it back on. (A complete shutdown is required; not just a restart of Windows.)
