

Instructions for Express BIOS Update

With the Intel Express BIOS Update utility, you can update your system's BIOS from within Windows*.

All BIOS update files for Intel® Desktop Boards are available on Intel's Download Center at <http://downloadcenter.intel.com/>.

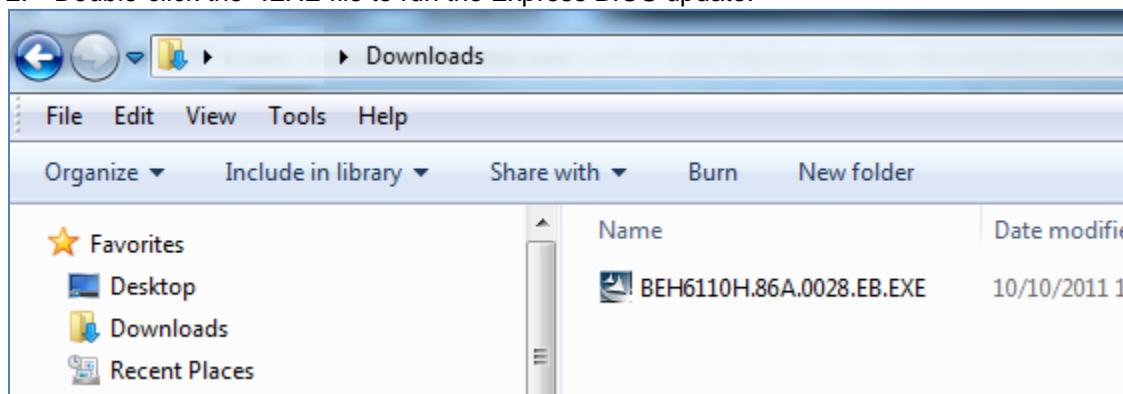

Important Notes:

- Update the BIOS on your computer only if the newer BIOS version specifically solves a problem you have. We do not recommend BIOS updates for computers that do not need it. You can view all BIOS changes in the Release Notes included on the BIOS download page in Download Center.
- Downgrading the BIOS to an earlier version is not recommended and may not be supported. An earlier BIOS version may not contain the support for the latest processors, bug fixes, critical security updates, or support the latest board revisions currently being manufactured.
- Before initiating a BIOS update, be sure to read and precisely follow the instructions included in this document. You may wish to print the instructions for easy reference.
- If a BIOS update process is interrupted, your computer may not function properly. We recommend the process be done in an environment with a steady power supply (preferably with UPS).
- Before updating the BIOS on the Intel® Desktop Board, manually record all BIOS settings that have been changed (from default) so they can be restored after completing the BIOS update.
- All images in this example are for illustration purposes only. You need to select the correct BIOS files for your board.

1. Download and save the Express BIOS update file to a temporary directory on the target computer.
Example:

File name: BEH6110H.86A.0028.EB.EXE	Version: 0028
Date: 07/15/2011	Status: Latest
Size: 5.53 MB	Language: English
Operating Systems: OS Independent, Windows 7, 32-bit*, Windows 7, 64-bit*, Windows Vista 32*, Windows V Edition*, Windows XP Media Center Edition*, Windows XP Professional x64 Edition*, Windows XP Professional*	

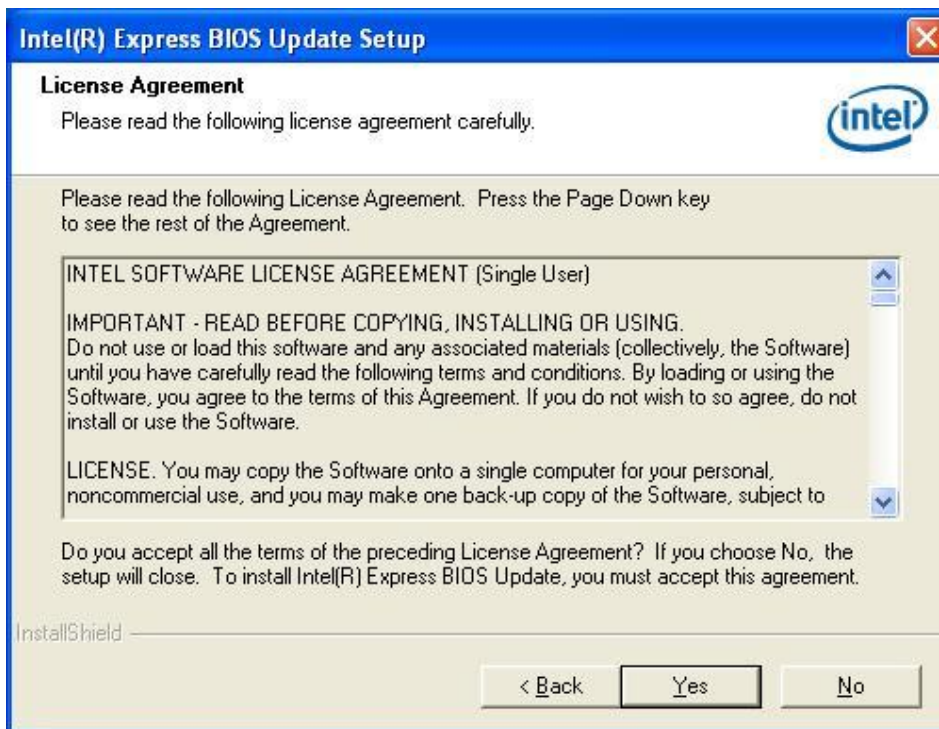

2. Double-click the *.EXE file to run the Express BIOS update.

3. Press **Next** on the Welcome screen.

4. Click **Yes** on the License Agreement screen if you agree with the License Agreement terms. Click **No** if you want to cancel the BIOS update.

5. Press **Finish**. Windows will shutdown to begin BIOS update process. Please **Do NOT** power off your computer for the next 3 minutes.

6. Upon restart, you will see the BIOS update process status window. **Do NOT** at any time power off the computer at this stage. When the BIOS update is complete, the computer will boot back into Windows.

```
Current revision:    BEH6110H.86A.0023.2011.0524.1826
Updating to revision: BEH6110H.86A.0028.2011.0715.1815

Preparing image for recovery firmware ... [done]
Preparing image for main firmware ... [done]
