1.0 Overview of the Release

1.1 Introduction

These Release Notes provide a brief overview of the changes introduced into the Intel® Omni-Path Fabric Manager GUI by this release. References to more detailed information are provided where necessary. The information contained in this document is intended for supplemental use only; it should be used in conjunction with the documentation provided for each component.

These Release Notes list the new features of the release, open issues, and issues that were resolved during release development.

1.2 Audience

The information provided in this document is intended for installers, software support engineers, and service personnel.

1.3 Software License Agreement

This software is provided under license agreements and may contain third-party software under separate third-party licensing. Please refer to the license files provided with the software for specific details.

1.4 If You Need Help

Technical support for Intel® Omni-Path products is available 24 hours a day, 365 days a year. Please contact Intel Customer Support or visit www.intel.com for additional detail.

1.5 Supported in this Release

This release contains no new features, it is a maintenance release that contains bug fixes and performance improvements.

This section lists the items supported for this release.

- Data is collected from the Fabric Manager’s Fabric Executive and local data storage and is shown in the GUI as Failures, Hot spots, or trends.
- Information for the Fabric Manager’s Device Groups, Virtual Fabric configuration, and Command Line Interface descriptions can be shown.
- Fabric Manager GUI Online help opens in a separate window. Context-sensitive help is also available.
Overview of the Release

- The Topology page provides topology information for selected resources, with a selection of Device Set Topology, Device Node topology, Link Topology, and Route Topology.
- The Administration Page allows the user to manage a subnet with Applications Management, Device Groups Management, Virtual Fabrics Management, an Interactive Console, and a Log Viewer.
- Other useful items include an Event Table, a Pin Board, and a Navigation bar.
- New Health Score calculation
- Email notification on events
- Application, Device Group, and Virtual Fabric management on ESM

1.6 Operating Environments Supported

This release of the Intel® Omni-Path Fabric Manager GUI supports all operating systems using JRE 1.7 or higher. The supported operating systems listed in Table 1-1 have been fully tested.

Table 1-1. Operating Environments Supported

<table>
<thead>
<tr>
<th>Operating System</th>
<th>Update/SP</th>
<th>Kernel Version</th>
</tr>
</thead>
<tbody>
<tr>
<td>Red Hat® Enterprise Linux® (RHEL®) 7.1 X86_64</td>
<td>Update 1</td>
<td>3.10.0-229.el7.x86_64</td>
</tr>
<tr>
<td>XLS: Red Hat® Enterprise Linux® (RHEL®) 7.2 X86_64</td>
<td>Update 2</td>
<td>3.10.0-327.el7.x86_64</td>
</tr>
<tr>
<td>SUSE® Linux® Enterprise Server (SLES) 12</td>
<td></td>
<td>3.12.28-4-default</td>
</tr>
<tr>
<td>SUSE® Linux® Enterprise Server (SLES) 12.1</td>
<td>Service Pack 1</td>
<td>3.12.49-11.1-default</td>
</tr>
<tr>
<td>Microsoft Windows® 8.1 (64-bit)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.7 Installation Requirements

The following are special or release-specific installation requirements for this release:
- Oracle® Java® Runtime Environment (JRE) 1.7 or higher.

1.8 Product Constraints

The following is a list of product constraints for this release:
- None

1.9 Product Limitations

The following is a list of product limitations for this release:
- The Applications, DeviceGroups and VirtualFabrics management on the Admin Page only apply on the common section on file opafm.xml. To change FM per instance configurations, you must manually edit the file.
- This release does not support proxy setup. To use FM GUI with proxy, you must run FM GUI locally with fabric, and then use remote desktop or a similar technique such as VNC, NX, or XMing to access FM GUI remotely via proxy.
## 1.10 Documentation

Table 1-2 lists the end user documentation for the current release.

Documents are available at the following URLs:

2.0 Issues

2.1 Introduction

This section provides a list of the resolved and open issues in the Intel® Omni-Path Fabric Manager GUI.

2.2 Resolved Issues in this Release

Table 2-1 lists the issues that are resolved in this release.

Table 2-1. Resolved Issues

<table>
<thead>
<tr>
<th>ID</th>
<th>Description</th>
<th>Resolved in Release</th>
</tr>
</thead>
<tbody>
<tr>
<td>132387</td>
<td>RESOLVED: FM GUI Fails to Open Due to Database Lock</td>
<td>Intel® Omni-Path Release 10.0.1.</td>
</tr>
<tr>
<td>132470</td>
<td>RESOLVED: Email not received when fabric event change is triggered</td>
<td>Intel® Omni-Path Release 10.0.1.</td>
</tr>
<tr>
<td>132481</td>
<td>RESOLVED: Cancel button does not work with ESM on the Admin -&gt; Applications Tab.</td>
<td>Intel® Omni-Path Release 10.0.1.</td>
</tr>
<tr>
<td>132705</td>
<td>RESOLVED: Typing “fmgui” in a terminal window does not launch previously configured settings</td>
<td>Intel® Omni-Path Release 10.0.1.</td>
</tr>
<tr>
<td>132500</td>
<td>RESOLVED: Unable to rename Virtual Fabrics and Device groups Names once saved</td>
<td>Intel® Omni-Path Release 10.0.1.</td>
</tr>
</tbody>
</table>

2.3 Open Issues

Table 2-2 lists the known open issues for this release, including a description and workaround.

Table 2-2. Open Issues

<table>
<thead>
<tr>
<th>ID/ Status</th>
<th>Product/ Component</th>
<th>Description</th>
<th>Workaround</th>
</tr>
</thead>
<tbody>
<tr>
<td>132571</td>
<td>Fabric Manager GUI Server and Client</td>
<td>Unable to run FM GUI through a SSL proxy</td>
<td>Run FM GUI locally with fabric, and then use remote desktop or similar technique such as VNC, NX, XMing, etc. to access FM GUI remotely via proxy.</td>
</tr>
<tr>
<td>133384</td>
<td>Fabric Manager GUI Client</td>
<td>Cannot deploy FM config change after a success deployment</td>
<td>Close and then re-launch FM GUI. Then apply changes and deploy them.</td>
</tr>
<tr>
<td>133071</td>
<td>Fabric Manager GUI Client</td>
<td>Topology failed to update correctly after dynamic fabric size change</td>
<td>Close FM GUI and then re-launch it.</td>
</tr>
</tbody>
</table>
