Description

The navigation tabs 'System Information', 'Server Health', 'Configuration', and 'Remote Control' in the Embedded Web Server of the Intel® Remote Management Modules do not work as expected with Mozilla Firefox version 38.

Resolution

This issue is resolved in Mozilla Firefox version 39

Root Cause

Changes in Firefox resulted in the javascript code createAttribute failing if an attribute contains uppercase letters. The Embedded Web Server of the Intel® Remote Management Modules use uppercase letters in the navigation tabs.

Further Resolution

Intel will also release a fix with the javascript code for the navigation tabs using all lowercase letters, for users with Firefox 38.
