## Intel® Remote Keyboard – Android\* Mobile App

---

### Version 1.14 – June 5, 2017

#### **New Features:**

- Added encryption to keyboard messages.
- Minor bug fixes.

#### **Known Issues**

- If additional microphones are connected to the host, Microphone (Virtual Microphone) must be set to default for microphone feature to work.

### Version 1.13 – November 14, 2016

#### **New Features:**

- Added quick launch feature with user defined shortcuts.
- Added microphone feature for Windows\* 10 with Cortana support.
- Fixed memory leak in 64-bit version of the Intel® Remote Keyboard Host App.
- Minor bug fixes.

### Version 1.12 – May 20, 2016

#### **New Fixes/Features:**

- Improved support for non-English keyboards when a program is run with elevated privileges:
  - The Windows input language and the mobile keyboard must match.
  - The following keyboards still do not work: Korean, Japanese, Chinese, Hebrew, and Russian.
  - In Command Prompt, the only keyboard that will work is the language of the operating system.
- Mobile app maintains list of previously connected devices that can be woken via Wake on Wireless LAN, so that they remain available after Refresh.
- Localized labels for the power option buttons.
- Added the ability to forget a device from the mobile app. Swipe left and press the X.
- Minor bug fixes.

### Version 1.11 – April 15, 2016

#### **New Fixes/Features:**

- Added power options and session management (e.g. Log Off, Switch User) buttons.
- Added function keys.
- Fixed issue that allowed the screen to rotate when auto-rotate was turned off in device settings.

- Fixed issue that prevented app from being used when connected to the host via a tethered WiFi connection.
- Other minor bug fixes.

#### **Version 1.9 – March 23, 2016**

##### **New Fixes/Features:**

- Added portrait and landscape mode to all scenes.
- Fixed issue that caused keyboard to close when device is rotated.

#### **Version 1.7 – February 19, 2016**

##### **New Fixes/Features:**

- Added media controls.
- Improved keyboard support when running with elevated privileges.
- Minor bug fixes.

##### **Known Issues:**

- Only the English keyboard works when a program is run with elevated privileges; output will match the Windows input language.
- A duplicate host may appear on the mobile app following the update, this can be solved by pressing “Refresh”.
- On non-admin accounts, it is not possible to type the admin password.

Both the Host and Mobile App must be updated in order to use the media controls.

#### **Version 1.6 – January 22, 2016**

##### **New Fixes/Features:**

- Added support for Czech, Danish, Dutch, Finnish, Hebrew, Norwegian, Romanian, Swedish and Turkish.
- Improved native keyboard support.
- Adjusted UI to better display all supported languages.
- Minor bug fixes.

##### **Known Issues:**

- Keyboard does not work when a program is run with elevated privileges.

#### **Version 1.5 – November 11, 2015**

##### **New Fixes/Features:**

- Voice commands for all versions of Android and for iOS 8+
  - Users can dictate text while using speech-to-text on their native keyboard.
  - Users can send commands to Cortana using speech-to-text and the phrase “Hey Cortana”.

##### **Known Issues:**

- If the host device is running Windows 8.1, “Hey Cortana” will send the user to the start screen.
- The native keyboard does not support non-Latin alphabets or accented characters.

## Version 1.4

### **New Fixes/Features:**

- UI update
- Minor bug fixes

## Version 1.2

### **New Fixes/Features:**

- Improved tablet support
- Resolved various connectivity and compatibility issues
- Improved language support

## Version 1.1

### **New Fixes/Features:**

- Added a sensitivity slider to help with high DPI devices
- Added option in settings to toggle between Android built in keyboard and app emulated keyboard
- Minor bug fixes
