The radio equipment as described and documented in the technical documentation as drawn up by the manufacturer is a wireless LAN module which supports the IEEE 802.11b, IEEE 802.11g, IEEE 802.11n, IEEE 802.11a, IEEE 802.11ac and IEEE 802.11ax standards. This wireless LAN module also supports Bluetooth® 5.2 radio technologies.

The radio equipment has been assessed for use in an ambient temperature range of -10 °C to +70 °C and for use with a nominal input voltage of 3.3 V DC. The radio equipment has been assessed for a body worn RF exposure condition and where the highest resulting SAR value is 1.36 W/kg (10g) for simultaneous transmissions. The radio equipment has been assessed assuming that each antenna port is connected to an external antenna having a peak gain of:
