

Wi-Fi 7 – The next evolution of Wi-Fi

Accelerated Connectivity

Greater than 5 Gbps** PC Wi-Fi speeds with consistent ultra-low latency – share files in seconds vs. minutes

Rock-solid Reliability

Peace of mind your PC will make and maintain the best Wi-Fi connections simultaneously

Wired-like Responsiveness

No-compromise gaming throughout the home

Enhanced Privacy & Security

Trust in your connectivity

** ">5 Gbps Wi-Fi 7 2x2 client speed" - is based on the current draft of the 802.11be specification which specifies the theoretical maximum data rate for a 2x2 device that supports 320 MHz channels, 4096 QAM, and Multi-Link Operation is 5.76 Gbps. Based on an industry-standard assumption of 90% efficiency for new Wi-Fi products operating in the exclusive 6 GHz band, the resulting estimated maximum over the air 2x2 client speed would be 5.19 Gbps.
