

Intel Business Solutions Help Wuhan University of Technology Accelerate Training

The Wuhan University of Technology is at the forefront of the integration of industry and education initiatives. The increase of teaching and research tasks at the University's Schools of Artificial Intelligence and Computer Science and Engineering and the continuous upgrading of industrial demands, places new demands on the schools for quantity of research equipment, software and hardware capabilities, and case resources. An upgraded data center powered by Intel edge-to-cloud technology is helping the university improve the training roadmap for integrating industry and education creates a more optimized and practical experimental environment for the university, and facilitates the dynamic adjustment of teaching and training programs to adapt to the ever-changing market demand for talent.

"We hope to realize the combination of engineering, software, and hardware in teaching and achieve in-depth integration through the amassment of academia at the University with the practice of industrial applications so that the academic training can better meet the requirements of real-world scenarios and future industrial needs.

Director of Intelligent Science and Technology, Teaching and Research Department, Wuhan University of Technology
