

The installation demonstrated the capability of CathexisVision to operate reliably in an environment that would require further upgrades and installations in future and exceptional integration with current third-party systems."

Operations Manager at a Large International Tourist Attraction

The CathexisVision Video Management Software & Video Analytics solution addresses safety and security with AI-powered video analytics and a highly flexible architecture built upon the powerful Intel® Distribution of OpenVINO™ Toolkit. The solution enables users to set specific triggers to quickly analyze large amounts of video footage, manage from a centralized location, and quicken incident response time. Supported on an intuitive graphical interface, the solution provides a customizable experience for control room efficiency. With CathexisVision, organizations can strengthen safety and security, improve operational efficiencies, and reduce expenses.

## CathexisVision Video Management Software & Video Analytics

Enhancing Safety and Security with a Suite of AI-enabled Features

Key Features				
	Effective Site Management	Control Room Efficiency	Situational Awareness	Integrated Solutions
