

**18.5%** increase  
in the productivity of Rogers  
Majeski knowledge workers,  
saving an average of 75 minutes  
per user per day.<sup>1</sup>

**2.3X** increase  
in document ingestion rates  
by automating tasks such as  
email processing, document  
filing, and report generation.<sup>2</sup>

“We’re very happy with the fact that we’re able to utilize our existing Intel systems, and we expect to continue to take advantage of the advanced AI technologies to streamline our operations.”

**Maks Agamir,**  
Director of IT,  
Ropers Majeski

## Integrated AI Solution Boosts Legal Firm’s Productivity and Accuracy

Ropers Majeski has provided high-quality legal advice to clients worldwide for over 70 years. They were searching for a way to automate a wide range of tasks, including documenting, filing, timekeeping, storing, and information retrieval. Their knowledge workers normally had to perform these tasks manually, which resulted in inaccuracies and consumed valuable, non-billable hours for highly trained personnel. Any automated solution would have to be fast, reliable, and able to handle a high volume of data to ensure regulatory compliance. They collaborated with Intel, Activelooop, and ZERO Systems to create a multi-layer AI system powered by high-performing 4th Gen Intel® Xeon® Scalable processors. The solution significantly improved worker productivity while maintaining data security.
