

SASB and TCFD Framework Alignment

Based on feedback gathered during our integrated investor outreach activities, we have aligned our disclosure with two additional frameworks: the Sustainability Accounting Standards Board Standards (SASB) and the Task Force on Climate-related Financial Disclosures (TCFD). Below is a mapping of how our latest disclosure aligns with these frameworks.

SASB. SASB has developed voluntary industry-specific disclosure standards for sustainability issues to facilitate communication by companies to investors of decision-useful information. Below, we have outlined how our existing disclosure aligns with the recommended metrics for the SASB Technology and Communications Sector – Semiconductor Standard. The SASB Standards became a resource of the IFRS Foundation as of August 1, 2022, upon the consolidation of the Value Reporting Foundation (which housed the SASB Standards and the Integrated Reporting Framework) into the IFRS Foundation.

SASB				
Topic	Accounting Metrics	Code	Intel Metric or Qualitative Disclosure	Disclosure Location ¹
Greenhouse Gas Emissions	(1) Gross global Scope 1 emissions and (2) amount of total emissions from perfluorinated compounds	TC-SC-110a.1	(1) 1.3 million metric tons CO ₂ e (2) 0.66 million metric tons CO ₂ e.	2025-26 Corporate Responsibility Report, p 35 CDP Climate Change Survey
Greenhouse Gas Emissions	Discussion of long-term and short-term strategy or plan to manage Scope 1 emissions, emissions reduction targets, and an analysis of performance against those targets	TC-SC-110a.2	We discuss our strategy, targets, performance, and long history of goal setting and reductions. We have also avoided 85% of our cumulative Scope 1 and 2 GHG emissions over the last decade.	2025-26 Corporate Responsibility Report, p 34-36 2025 Intel Annual Report on Form 10-K, p 16-17 CDP Climate Change Survey
Energy Management in Manufacturing	(1) Total energy consumed, (2) percentage grid electricity, and (3) percentage renewable	TC-SC-130a.1	(1) 43.0 million gigajoules energy consumed (2) 85% grid electricity (3) 99% renewable energy globally.	2025-26 Corporate Responsibility Report, p 34-36
Water Management	(1) Total water withdrawn and (2) total water consumed, percentage of each in regions with High or Extremely High Baseline Water Stress	TC-SC-140a.1	(1) 46.6 million m ³ withdrawn (2) 11.3 million m ³ consumed. See Appendix for detail on water metrics by location, including information on baseline waster stress by location.	2025-26 Corporate Responsibility Report, p 37 , 60-61
Waste Management	(1) Amount of hazardous waste from manufacturing, (2) percentage recycled	TC-SC-150a.1	(1) 94,264 metric tons (2) 86% recycled.	2025-26 Corporate Responsibility Report, p 38 , 58 Report Data File on Report Builder website
Employee Health & Safety	Description of efforts to assess, monitor, and reduce exposure of employees to human health hazards	TC-SC-320a.1	We have maintained a multi-site ISO 14001 certification for our manufacturing locations since 2001, which requires independent third-party audits at many of our sites each year. In 2019, we established a company-wide certification to ISO 45001, an internationally recognized standard for environmental, health, and safety management systems, which requires independent third-party audits at our manufacturing sites.	2025-26 Corporate Responsibility Report, p 23
Employee Health & Safety	Total amount of monetary losses as a result of legal proceedings associated with employee health and safety violations	TC-SC-320a.2	Information on legal proceedings is disclosed in our Annual Report on Form 10-K and in our Quarterly Reports on Form 10-Q, available on our Investor Relations website.	2025 Intel Annual Report on Form 10-K, p 102-105 Investor Relations website

¹ The “Intel Metric or Qualitative Disclosure” column references the specific disclosure(s) included in the 2025-26 Corporate Responsibility Report and therefore may vary from the breadth and context of disclosure(s) included in the 2025 Intel Annual Report on Form 10-K and 2026 Proxy Statement, if applicable.

Topic	Accounting Metrics	Code	Intel Metric or Qualitative Disclosure	Disclosure Location ¹
Recruiting & Managing a Global & Skilled Workforce	Percentage of employees that are: (1) foreign nationals and (2) located offshore	TC-SC-330a.1	We do not disclose the first metric as we do not believe a single percentage of foreign nationals is a useful metric for our business given our global business model, but we do disclose a breakdown of our workforce by region. We disclose additional human capital metrics that we believe are more effective for assessing this aspect of our performance, including diversity and inclusion, employee engagement, training and development, and responsible supply chain metrics.	2025-26 Corporate Responsibility Report, p 19-20 2025 Intel Annual Report on Form 10-K, p 15
Product Lifecycle Management	Percentage of products by revenue that contain IEC 62474 declarable substances	TC-SC-410a.1	While we do disclose information on our strategy and approach to product ecology and supplier requirements for declarable substances, we do not believe a single percentage of revenue is an effective metric for evaluating risk and performance in this area.	2025-26 Corporate Responsibility Report, p 41 Material Declaration Data Sheet (MDDS) database
Product Lifecycle Management	Processor energy efficiency at a system-level for: (1) servers, (2) desktops, and (3) laptops	TC-SC-410a.2	We do not disclose single percentages for these product categories, given the wide range of products we produce in each category and the continued release of new products. We believe more decision-useful information is our disclosure regarding our overall strategy for product energy efficiency, supporting goals, industry collaborations, and public policy engagements.	2025-26 Corporate Responsibility Report, p 47-49
Materials Sourcing	Description of the management of risks associated with the use of critical materials	TC-SC-440a.1	We provide disclosure on our management approach to responsible minerals sourcing. With respect to rare earth elements, Intel has thoroughly reviewed product and supply chain impacts and determined that although certain regional supplies may fluctuate, Intel has sufficient existing supply, alternative sourcing, and/or low risk material availability within our manufacturing and supply chain. Intel has confirmed that access to rare earth mineral supplies represents a low risk to impact production or delivery of goods.	2025-26 Corporate Responsibility Report, p 31 SEC Conflict Minerals Filing Intel Statement on Rare Earth
IP Protection & Competitive Behavior	Total amount of monetary losses as a result of legal proceedings associated with anti-competitive behavior regulations	TC-SC-520a.1	Information on legal proceedings is disclosed in our Annual Report on Form 10-K and in our Quarterly Reports on Form 10-Q, available on our Investor Relations website.	2025 Intel Annual Report on Form 10-K, p 102-105 Investor Relations website

¹ The “Intel Metric or Qualitative Disclosure” column references the specific disclosure(s) included in the 2025-26 Corporate Responsibility Report and therefore may vary from the breadth and context of disclosure(s) included in the 2025 Intel Annual Report on Form 10-K and 2026 Proxy Statement, if applicable.

SASB and TCFD Framework Alignment, continued

TCFD. The Task Force on Climate-Related Financial Disclosures (TCFD) developed a voluntary framework for use by companies to provide information to investors, lenders, insurers, and other stakeholders on climate-related financial risk disclosure. Below, we have outlined how our existing reporting aligns with the recommended disclosure. We will continue to evaluate opportunities to evolve our disclosure moving forward based on discussions with our investors and stakeholders.

TCFD			
Disclosure Area	TCFD Recommended Disclosure	Intel Metric or Qualitative Disclosure	Disclosure Location
Governance	Disclose the organization’s governance around climate-related risks and opportunities.	Responsibility for oversight of corporate social responsibility issues, including climate change, has been included in the Corporate Governance and Nominating Committee Charter since 2003. Intel follows an integrated approach to addressing climate change with multiple teams responsible for managing climate-related activities, initiatives, and policies, including manufacturing and operations, government and public affairs, supply chain, and product teams. Strategies, progress toward goals, and regulatory developments are reviewed with senior executives from these teams on a regular basis. We do not underestimate the challenges ahead—particularly the risks and opportunities that we and the global community will face due to climate change. Our Climate Transition Action Plan demonstrates our past and future commitment to the advancement of technologies that help us achieve our climate goals in every capacity that our business touches.	2025-26 Corporate Responsibility Report, p 11-12 Climate Transition Action Plan 2025 Proxy Statement, p 25-27 CDP Climate Change Survey
Strategy	Disclosure of the actual and potential impacts of climate-related risks and opportunities on the organization’s businesses, strategy, and financial planning where such information is material.	We describe our climate-related risks and opportunities in our Corporate Responsibility Report (in the “Our Business” and “Climate and Energy” sections), the Intel Climate Change Policy Statement, and the risk-factors section of our Annual Report on Form 10-K. We focus on reducing our own direct climate “footprint”—the emissions resulting from our own operations, our supply chain, and the marketing and use of our products. For more than two decades, we have set aggressive greenhouse gas (GHG) reduction goals to conserve energy and reduce emissions. As a result of these actions, we have avoided 85% of our cumulative Scope 1 and 2 GHG emissions over the last decade. Intel published its updated Climate Transition Action Plan (CTAP), detailing the company’s path to reach net-zero GHG emissions. The CTAP is aligned with TCFD guidance on transition plans. This plan demonstrates our commitment to integrating sustainability into our core business, building resilience into our operations and value chain, and fostering innovation.	2025-26 Corporate Responsibility Report, p 35-37 Intel Climate Change Policy CDP Climate Change Survey
Risk Management	Disclose how the organization identifies, assesses, and manages climate-related risks.	Our overall approach to risk management is described in our Proxy Statement and our risk factors are described in our Annual Report on Form 10-K. Additional detail on our proactive efforts to reduce our climate change impacts is included in our Corporate Responsibility Report, primarily in the Climate and Energy section as well as our CDP Climate Change report. This includes detail regarding our investments in renewable electricity, energy conservation, and product energy efficiency. In 2025, we achieved 100% renewable electricity for our U.S., Europe, Israel, Malaysia, Vietnam, and China locations, and 97% in Costa Rica—bringing the global total to 99% as of the end of 2025. We also describe our proactive engagements with policymakers on climate and energy issues in our Corporate Responsibility Report and the Intel Climate Change Policy. We proactively engage with our stakeholders to understand impacts of potential regulatory requirements and also changing expectations of stakeholders, including our investors, customers, and local communities. In 2025, we published our updated Climate Transition Action Plan .	2025-26 Corporate Responsibility Report, p 35-37 Climate Transition Action Plan 2025 Proxy Statement, p 25 2025 Intel Annual Report on Form 10-K, p 31 Intel Climate Change Policy CDP Climate Change Survey
Metrics and Targets	Disclosure of the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.	Our public climate-related metrics, goals and targets, as well as our Scope 1, 2, and 3 GHG emissions data, are included in our annual Corporate Responsibility Report and also reported through the CDP Climate Change report. In 2025, we published our updated Climate Transition Action Plan .	2025-26 Corporate Responsibility Report, p 35-37 CDP Climate Change Survey
