

August 2021 Update

Global Environmental, Health, and Safety Policy

At Intel Corporation we are committed to be leaders in everything we do. We are motivated to care for people and the planet from the development of our products, through our manufacturing and supply chain. We are confident that our technology will play a key role in addressing the planet's sustainability challenges.

We are committed to these principles:

Regulatory Compliance and Beyond

We comply with all applicable regulatory and Intel Environmental Health & Safety (EHS) requirements wherever we operate. We proactively engage with stakeholders to develop responsible laws, regulations and innovative programs that provide safeguards for the community, the workplace, and the environment, while allowing flexibility to advance our technologies. We recognize the importance of EHS to business success and we are committed to continually improving our EHS Management System, including standards, culture, performance, and injury reduction initiatives.

Safety and Health

Our commitment is to provide a safe and injury-free workplace for all our employees, contractors, customers, partners, and the public. We are constantly assessing and improving our EHS programs and trainings to increase our focus on prevention, early intervention & safety culture. We continue to strive to integrate safety into our daily business and to encourage responsibility for our own & others' safety. We promote a healthy lifestyle and encourage employees to proactively manage their personal health and wellness.

Environmental Sustainability

We strive to be a global leader in sustainability and environmental protection and to enable our customers and others to reduce their environmental impact through our actions and technology. We identify key environmental aspects of our operations and mitigate impacts incorporating circular economy principles. We will continue to invest in conservation, we will work to reduce our environmental footprint and adhere to our environmental policies (climate, water, and energy) and RISE goals.

Public Information Transparency

We are a responsible member of the communities in which we live and work. As we expand our knowledge and understanding of the impact of our operations and our products, we share this knowledge with the broader community to increase awareness of the importance of environmental issues. We transparently establish and regularly report on our RISE EHS related goals and metrics.

Supplier and Contractor Relationships

We hold our suppliers accountable to the same expectations we have for ourselves. We are committed to advancing accountability and improving EHS performance through proactive communication, assessments, and capability-building programs. We set high safety training and performance expectations during our contracting process and orientation for new on-site suppliers. We partner with our chemical and gas suppliers on green chemistry initiatives and with general suppliers on environmental, health and safety initiatives.

Emergency Preparedness

We proactively evaluate our risks, coordinate periodic testing and learn from previous situations to continuously improve our processes, and be prepared to respond to emergencies that could impact health & safety of employees, the environment, our operation and communities in which we operate.

Intel will ensure the necessary resources and management oversight to engage our employees to advance the principles and actions outlined in this policy. We will drive EHS excellence and continuous improvement throughout our global operations accelerating progress against the world's greatest challenges.

Patrick Gelsinger, Chief Executive Officer of Intel Corporation
