signage solution.¹

Elevating Foot Traffic and Engagement with Digital Signage

With over a thousand storefronts nationwide, Famous Footwear needed a digital signage solution that could scale. In addition to delivering localized content, the solution needed to be reliable, cost-effective, and flexible enough to meet different store needs, from small-footprint LCDs to large, eye-catching LED window displays. Famous Footwear turned to ComQi's end-to-end digital signage solution. The deployment features ComQi Intel® processor-powered media players that are vetted as Intel® IoT Market Ready Solutions. The media players run EnGage, ComQi's cloud-based digital signage platform that enables retailers to create, manage, and analyze content locally across an easily managed network of devices.
