

*ISS Video Analytics solutions provide actionable data relevant to productivity, security, and compliance regulations to identify behaviors that generate alerts to security personnel. This enables immediate response to different safety and compliance situations, such as blocking entry, starting a recording, or triggering an alarm.*

Intelligent Security Systems (ISS) is a global leader in video management and video analytics software solutions. ISS Labor Safety Solutions are a suite of video analytics solutions that enable customers to create safer spaces for their workers and end customers. Through human behavior analysis ISS solutions enhance safety in key areas of concern across a wide variety of use cases such as helmet detection in industrial settings, hand washing detection in food manufacturing and processors, and mask detection in public spaces.

# ISS SecurOS Labor Safety Solutions

Protecting Workers and Customers with Video Analytics Solutions

Key Features

-  **Helmet Detection**
-  **Hand Sanitizing Detection**
-  **Mask Detection**
-  **Human Behavior Analysis**

**Vertical:**

- Government/Public Sector
- Manufacturing
- Industrial
- Education

▪ Health & Life Sciences

- Hospitality
- Retail

**Use Case:**

Human Wellness Monitoring

**Country/Geo:**

North America, Latin America, Asia Pacific, Europe, Middle East
