Building Innovative Security Services to Help Startups Protect Data and Focus on Growth

Headquartered in Bucharest, Romania, Safetech Innovations provides tailored cybersecurity services, including security operations center (SOC) outsourcing. As part of a cofinanced initiative with the European Regional Development Fund, the company aims to enable highly automated SOC workflows—allowing it to protect more clients across Europe and beyond with the same headcount. By deploying Lenovo ThinkSystem SR630 servers, powered by 2nd Generation Intel® Xeon® Scalable processors, and Lenovo ThinkSystem DE2000H storage, Safetech Innovations has created the high-performance platform to develop the offering and bring greater information security to more clients around the world.
