CUSTOMER ADVISORY
ADV1719
Stratix® 10 FPGA IHS Dimple Fiducial Addition

Change Description:

Intel® Programmable Solutions Group ("Intel PSG", formerly Altera) is notifying customers that Stratix® 10 products use either an integrated heat spreader (IHS) lid design with a small dimple fiducial or an IHS lid with no dimple. See Figure 1 and 2 below for side by side comparison.

The dimple fiducial is added as a continuous improvement action for detection by the vision system during the lid pick-up process.

There is no change to the package dimensions and no expected impact to the customer’s board assembly process.

After depletion of the IHS lid material with no dimple, the affected products will continue to use the IHS with the dimple fiducial.

This is a round impression on the lid
**Recommended Action**

Customers are being notified to take note of this change to the integrated heat spreader lid appearance. Please note that once the change takes effect, customers may receive units with or without the fiducial dimple on the IHS.

**Products Affected:**

All Stratix 10 Products

- The scope of this customer advisory also covers all new or future Ordering Part Numbers (OPNs).

- Only for reference, a list of the current OPNs that have shipped to-date are also provided via the link below. It is important to note that the change is not only limited to this list of OPNs, but applies to all Stratix 10.

Reason for Change:

The dimple fiducial is added as a continuous improvement action for detection by the vision system during the lid pick-up process.

Change Implementation
