

# MICROCODE REVISION GUIDANCE

MAY 14, 2019

# MCU RECOMMENDATIONS

## Section 1 – Planned microcode updates

- Provides details on Intel microcode updates currently planned or available and corresponding to Intel-SA-00233 published May 14, 2019.
- Changes from prior revision(s) will be highlighted in yellow.

## Section 2 – No planned microcode updates

- Products for which Intel does not plan to release microcode updates. This includes products previously identified as such.

### LEGEND:

#### Production Status:

- Planned – Intel is planning on releasing a MCU at a future date.
- Beta – Intel has released this production signed MCU under NDA for all customers to validate.
- Production – Intel has completed all validation and is authorizing customers to use this MCU in a production environment.

# SECTION 1 – PLANNED MICROCODE UPDATES

# NOTICES

Intel provides these materials as-is, with no express or implied warranties

All products, dates, and figures specified are preliminary based on current expectations, and are subject to change without notice.

Intel, processors, chipsets, and desktop boards may contain design defects or errors known as errata, which may cause the product to deviate from published specifications. Current characterized errata are available on request.

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Performance varies depending on system configuration. No product or component can be absolutely secure. Check with your system manufacturer or retailer or learn more at <http://intel.com>.

Some results have been estimated or simulated using internal Intel analysis or architecture simulation or modeling, and provided to you for informational purposes. Any differences in your system hardware, software or configuration may affect your actual performance.
