

PREDICT THE FUTURE

WITH VISUAL EXPERIENCES THAT ARE PERSONALIZED, CONNECTED, AND DATA SMART

Digital signage experiences are everywhere. They are fast becoming a versatile and smart medium for a wide spectrum of vertical industries—communicating, inspiring, informing, protecting, training, monitoring, and interacting with us.

WHAT CAN VISUAL EXPERIENCES DO?

Digital signage experiences are fundamental in today's unified commerce revolution. Across a wide spectrum of vertical industries, delivering visually compelling content engages end users and fuels business growth. Connecting shoppers to brands and retailers, citizens to city services, and patients to healthcare providers is only the beginning. With Intel®-based digital signage solutions, software and hardware combine to deliver a new age of software-defined digital experiences.

Through Intel-based digital signage solutions, you can streamline the creation of feature-rich, interactive, and scalable digital solutions to transform your business, reach your customers, and deliver new services.

Drive mobile engagement by tracking human behavior
Target messages based on gender and age
Personalize experiences

Interact with viewers
Connect to social feeds
Educate and inform
Integrate near-real-time data

Measure and heat map
Surprise and delight
Monitor environments
And much more

YOUR BEST DIGITAL SIGNAGE EXPERIENCES ARE BUILT WITH INTEL

Intel is driving ecosystem standards and bringing long-standing expertise in high-performance technology, security, manageability, and analytics to the ecosystem—pushing the boundaries of what's possible.

Intel's OPS+

OPS+ brings future proofing for display and media player designs with up to 8K display/video bandwidth, Intel® CPU- and Intel® FPGA-based flexible designs, plus backward compatibility with OPS displays.

Intel® Smart Display Module (Intel® SDM)

See our smallest form factor specification yet for the thinnest integrated digital displays.

Intel Visual Data Device Specification

E-classroom workload consolidation for broadcasting, recording, and interactive whiteboard management.

UNSTOPPABLE ECOSYSTEM INNOVATION

Bold solutions are creating new value across industries. Here are just a few of the possibilities.

WayPoint® Public Kiosk

CIVIQ's Intel® processor-based WayPoint® public kiosk features interactive screens, security cameras, analytics cameras, video, and Wi-Fi.

Interactive Whiteboards

Experience an education-focused interactive whiteboard based on Intel's OPS+ and Intel® vPro™ technology.

Video Walls

Along with DISE and onActivity, see what you can do with video walls and interactive flat panels enabled with Intel® Smart Display Modules.

Digital Signage

Fast, rich-media players for digital signage, interactive kiosks, and 4K video walls.

Interactive Kiosks

Interactive, customizable self-service kiosk and digital signage solutions with Intel vPro technology—for industries including healthcare, retail, restaurants, transportation, and business administration.
