WAND uses the Intel® NUC to create digital menu boards that make positioning, promoting, and ordering food easy.

“We need devices that can deliver our beautiful content without ‘hiccups,’ and the Intel NUC delivers.” Chuck Gehman, vice president of product management, WAND

A PICTURE SO GOOD YOU CAN TASTE IT

13 concealed Intel NUC mini PCs drive digital menus in Whole Foods' delis.

Intel® HD graphics lets users see the sizzle on their chicken and gets their mouths watering.

Intel Core processors have the performance WAND needs to drive menus, POS, and handle analytics data.
