Overview Video
1. Access the Intel® DevCloud for the Edge through your web browser

2. Develop and test applications online using GitHub and datasets stored in the Intel® DevCloud's cloud storage

3. Test sample code to showcase benchmarking capabilities to customers. Customers can also test their own applications for benchmark performance results

4. Runs tests to benchmark the application’s performance on selected Intel processors and accelerators

5. Produces the inference video/image as output

6. Provides performance results to find the optimal hardware for the tested AI vision application
Thank you for watching!
