
MICROSOFT ONENOTE IN EDUCATION

For Intel® Education Resellers
2017

Microsoft OneNote

Schoolwork includes a lot of information, and OneNote helps students and teachers capture it all, on any device. Everyone can stay organized, share lessons, work together, and even spark their creativity.

Student benefits

- Easier organization, note-taking, and digital inking inspires creativity and improves retention
- Insert screen clips and any file type
- Collaborate with others, from any device

Teacher benefits

- Organize lesson plans and course content in searchable digital notebooks
- Provide real-time student coaching and feedback via text or voice
- Improved collaboration with students and fellow teaching staff

"OneNote is so much more than a piece of software, it is a framework for **teaching** and learning."

Rob Baker, Director of Technology, Cincinnati Country Day School

"OneNote, simply put, is one of the most powerful **teaching** and learning tools I've ever encountered."

Dr. Gregory K. Martin, Upper School Director, La Jolla

OneNote Class Notebook

A framework for teaching and learning with OneNote and Office 365

1

Teacher:

Creates shared notebook, adds students

Sees everything in notebook

2

Students:

Get link to notebook, opens on their device or browser

Sees shared sections and only their personal notebook along with collaboration space and copy-only content library.

Collaboration space

Content Library

Student Notebooks

- "Anything, anywhere" canvas (type, write, clip web, insert files)
- Ready-made digital portfolio for any class.
- Real-time coaching ("Flip the classroom")
- Natural learning with digital ink to write or annotate
- Fits many learning styles with a variety of inputs and uses
- **One powerful notebook for an entire class**

Engagement & Accountability

Digital Content Delivery & Community

Personalized Learning

Personalized learning is the tailoring of pedagogy, curriculum and learning environments by learners or for learners in order to meet their different learning needs and aspirations.

Example Scenarios:

1) **Private feedback** – Through the private student notebooks encapsulated within the Class Notebook, teachers are able to view student work, and interact privately. This allows an individualized experience
2) **Individualized assignments** – Teachers are able to drop individualized assignments privately into a student's notebook, and differentiate in a way that can meet more needs of the students, whether struggling or advanced
3) **Multi-modal feedback –** Teachers have the ability to give text, written, audio and video feedback to adapt to a student's style

There are many different ways that teachers are personalizing learning with OneNote

Teacher giving audio feedback for assignments

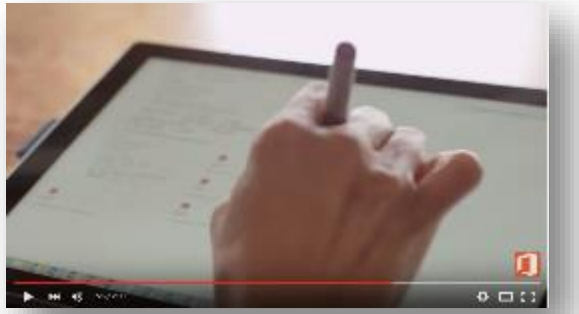
Spanish teacher personalizing feedback



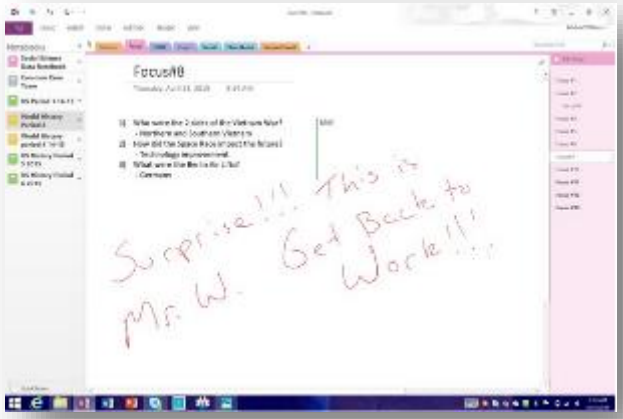
Real-time Feedback

Example Scenarios:

1) **Short learning cycle** – The teacher can quickly pull up any private student work in real-time and give quick feedback or formative assessment. This shortens the learning cycle dramatically
2) **Individualized attention** – Now possible with Class Notebooks and private student sections. Able to differentiate and individualize much faster with all input types. Increased quality and quantity of feedback
3) **Project based learning** – Able to give real-time feedback to group projects in real time, which can help spur the group to deeper learning. Also give private feedback to a student who then injects the learning into the group

Many teachers have called this real-time feedback aspect of Class Notebooks a "game changer"

[The Classroom Evolution with OneNote]



Engagement and Accountability

Example scenarios:

1. **All in one place** – Using class notebooks, all of the student work is captured in one place, never lost, and teachers can see exactly what is being done
2. **Real time feedback** – with Class Notebooks and real-time feedback, teachers can provide quick intervention, leading to higher engagement
3. **Accountable** – Because a teacher can show the class notebook easily on screen at any time showing any student with a click, students are more likely to be prepared

A common pattern we've been hearing is that students are more engaged and accountability has increased with Class Notebooks

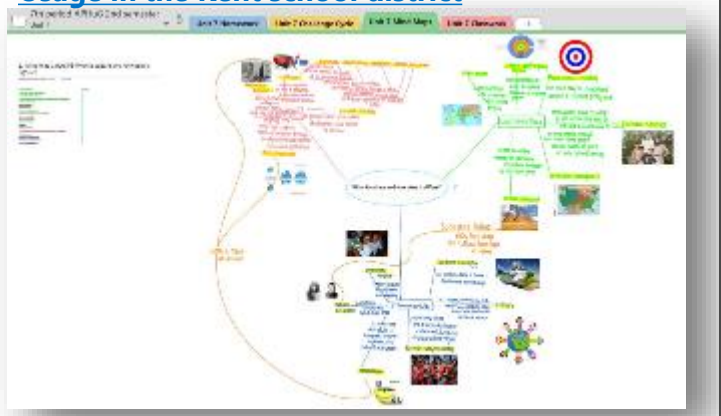
Usage in the Kent school district



Inclusive Classroom

Example scenarios:

1. **Discreet feedback** – The private student areas in Class Notebooks allow teachers to discreetly give feedback and help without calling out specific students
2. **ParaEducators** – added as co-teachers in a Class Notebook to allow proximity independence for special needs students. The ParaEducator now sit in back of the room and can give private feedback and work with students
3. **Dyslexia** – OneNote's organizational model helps dyslexic students keep up in class more effectively. In addition, Learning Tools for OneNote helps address literacy and dyslexia
4. **Learning Styles** – OneNote's multi-modal inputs and flexibility appeals to a diverse set of learners and learning styles

A set of example resources of OneNote being used with diverse sets of learners

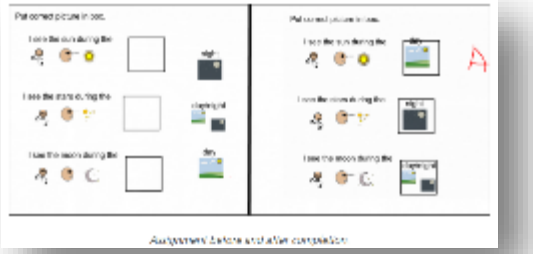
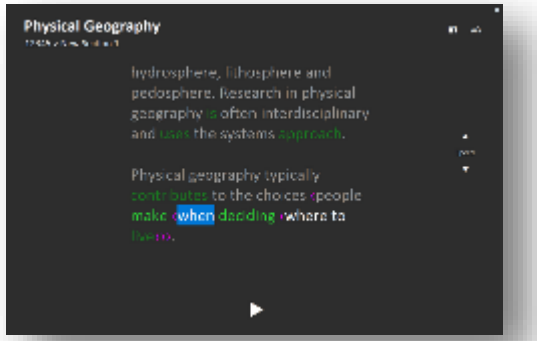
Using OneNote for students with autism



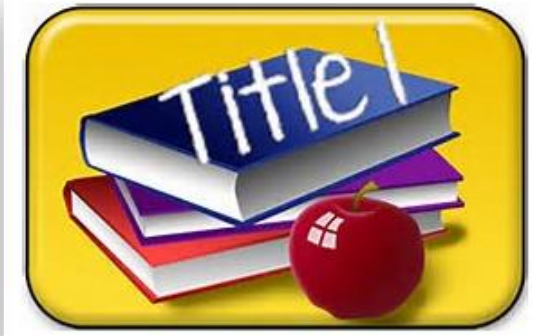
Learning Tools for OneNote - **Hackathon Grand Prize, focus on literacy, dyslexia, and ELL/ESL**



Anytime, Anywhere Learning

Example scenarios:

1. **Student athletes** – Riding the bus and doing homework using Class Notebooks' offline capabilities
2. **Title I Schools** – Students where families don't have WiFi or internet access at home
3. **Scotland** – Moving all curriculum into OneNote Class Notebooks and using Class Notebooks' offline capabilities because many students don't have internet access at home on small islands.



OneNote is available on every platform and device and also has a rich offline story. This enables true anytime, anywhere learning.

[Scotland teachers run Hackathons to move curriculum to OneNote in support of anywhere anytime learning]

Digital Content, Distribution & Community

- Teachers, schools, nations, and 3rd parties are choosing OneNote as a content delivery mechanism.
- The rich canvas, organizational structure, collab and any-device access give it a unique differentiation compared to Word, PDF or Google Docs.

Conversion

- Paper
- PPT
- Word
- InDesign/PDF
- EPub

Distribution

- National Curriculum
- Lesson plans
- Study guides
- Templates
- 1st and 3rd party content

Community

- Educator Community
- Docs.com
- Social media
- eBook stores
- Partner websites
- Office 365/Yammer

There are numerous examples to explore demonstrating what customers are already doing, or planning on doing

- OneNote and AVID binders
- Mystery Skype Curriculum
