An end-to-end learning application

Optimized for Wireless Internet, next-generation Classroom Management, part of the Intel® Learning Series Software Suite, provides a friendly, collaborative classroom solution to help teachers teach and students learn. With enhanced performance and availability in an ever-expanding number of languages, Classroom Management is suitable for educators worldwide.

Easy-to-use Classroom Management user interface
Classroom Management Benefits

Classroom Management includes a range of features to support effective teaching and learning—supporting interactivity and collaborative work, and providing tools to organize lessons and assess student progress.

Interactive Learning
Classroom Management helps facilitate student interaction in the classroom. It is designed to keep students focused and engaged in learning—from absorbing information to creating content. The application is purpose-built for 1:1 eLearning, and supports diverse individual learning styles.

Group Collaboration
With Classroom Management, teachers can organize students into virtual groups and facilitate group collaboration. Designated group “leaders” can be granted additional capabilities. For instance, they may be permitted to share their screens and files with the other students in their group. To enhance collaboration, teachers can also join groups to chat with students.

Teaching
Classroom Management provides teachers with efficient tools to organize lessons and manage student work. Teachers can “push out” curriculum materials from their PCs to student PCs, send homework assignments, and collect student files for review and evaluation. The software allows teachers to view student screens and provide assistance remotely, as well as supports communication between teachers and students.

Assessment
Classroom Management has a practical set of features that allow teachers to assess student progress by creating and administering quiz papers. Teachers can also give students an instant quiz comprising a single question, which can be a useful tool for assessing individual learning during lectures and discussions. Teachers can view students’ quiz results in real time.
“Classroom Management provides a friendly, collaborative classroom solution to help teachers teach and students learn.”

Purpose-built for Education

**Teaching**

Intel® Learning Series PC capabilities support a variety of teacher-student interactions.

- **Teacher Broadcast:** Broadcast information in real time to students’ screens
- **Net Movie:** Open a short media clip and display it on students’ Intel Learning Series PCs
- **File Transfer:** Send homework, learning materials, or other files to students’ Intel Learning Series PCs
- **File Collection:** Collect students’ homework and other files from their Intel Learning Series PCs
- **Announce:** Send a message to students’ Intel Learning Series PCs
- **Screen Record:** Record a video of a teacher’s interaction, and then play it back for students
- **Student Demonstration:** Allow a student to present work on the Intel Learning Series PC to the teacher and class
- **Raise Hand:** Allow student to get the teacher’s attention or ask questions

**Facilitate Learning**

When students use Intel Learning Series PCs, teachers can take advantage of a full range of management features:

- **Thumbnails:** Easily view real-time activities on students’ screens
- **Monitor and Control:** Remotely assist individuals or groups of students
- **Remote Command:** Assist students by issuing remote commands to shut down, reboot, or close programs
- **Remote Launch:** Remotely launch programs for students
- **Student Register:** Allow students to check in for required online lessons
- **Silence:** Simultaneously display a message on student PCs, mute their sound devices, and block their input devices
- **Lock:** “Lock” students onto the system once they are connected and maintain this connection until they are “unlocked”

**Collaboration**

Intel Learning Series PCs enable diverse collaborative models for teachers and students, supported by management features, including:

- **Group Management:** Teachers can create groups and identify students as group leaders
- **Group Teaching:** Grant group leaders additional capabilities to help lead their groups
- **Group Chat:** Teachers and students can exchange messages

**Assessment**

Intel Learning Series PCs give teachers the tools to manage a spectrum of assessment methods:

- **Quiz Maker:** Create quizzes in real time, or prepare them in advance
- **Quiz Paper Import:** Import quizzes created in other formats
- **Start Quiz:** Distribute, start, and collect quizzes during a class
- **Quiz Grader:** Score quizzes and send results to individual students
- **Instant Quiz:** Allow instant polling of students
