The Shape that Fits the Future.
INTEL® NUC: GO SMALL. GET BIG!

Get ready for spectacularly responsive performance from the Intel® NUC Mini PC kits with 8th generation Intel® Core™ i3 processors. The latest generation of Intel NUC kits let you or your customers build the exact system they want. From choosing chassis size to memory options to storage configurations, the benefit of building an Intel NUC kit is the ability to completely customize the kit for your specific usage. Whether working on presentations, word processing, or streaming media, the Intel® NUC8i3BEK and NUC8i3BEH Mini PC kits deliver the features people want—in a size that fits easily into any lifestyle and any room in the house.

The first Intel NUC Mini PC kits with a dual-core 8th generation Intel® Core™ i3 processor

The Intel NUC8i3BEK Mini PC kit with a true dual-core 8th generation Intel Core i3 processor delivers a big jump in performance compared to the previous generation Intel® NUC7i3BNH/BNK kits. Whether it’s built for a new home PC or a system with 4K UHD graphics for picture perfect entertainment, the Intel NUC8i3BEK Mini PC kit gives great visual immersion with Iris® Plus Graphics 655 and the unprecedented performance of Intel® Core™ processors.

The slightly taller Intel NUC8i3BEH has the same processor and graphics, and also has room for a 2.5” HDD and is Intel® Optane™ memory ready. By coupling a 2.5” HDD and Intel Optane memory, performance improves dramatically with up to 1.4x faster media loading.

Work Like a Boss with Thunderbolt™ 3, USB 3.1, and 4K Ultra HD

The Intel NUC Mini PC kits have chassis that are connectivity powerhouses. Both come with Thunderbolt™ 3 which supports up to 40 Gbps of data transfer, four USB 3.1 ports, two additional USB ports via 1x4 internal headers. There’s also room for an M.2 SSD. The Intel NUC Mini PC kits support triple displays all in 4K Ultra HD—with an HDMI* 2.0a port and DisplayPort* 1.2 via USB-C—so images or work can show across three screens without losing fidelity.

Think you know what small can do? Think again.

In a footprint that’s almost zero—especially when compared with a tower—the Intel NUC Mini PC kits can be custom built to have the performance and features of a desktop PC in a device that fits in the palm of your hand. The small size means the Intel NUC can be positioned almost anywhere—from behind a display to tucked discretely in an entertainment center. And with improved cooling, fan noise is minimal—which means a quieter experience no matter where the Intel NUC is positioned.

The Intel® NUC: who says small isn't powerful?
