

Thunderbolt™ 3

More Speed. More Pixels. More Possibilities.

The USB-C That Does It All

Thunderbolt™ 3 brings Thunderbolt to USB-C at speeds up to 40 Gbps, creating one compact port that does it all – delivering the fastest, most versatile connection to any dock, display, or data device. For the first time, one computer port connects to Thunderbolt devices, every display, and billions of USB devices. A single cable now provides four times the data and twice the video bandwidth of any other cable, while also supplying power. It's unrivaled for new uses, such as 4K video, single-cable docks with charging, external graphics, and built-in 10 GbE networking. Simply put, Thunderbolt 3 delivers the best USB-C.

Full 4K Video Experience

Connect displays with astonishing resolution, contrast, and color depth to see your photos, videos, applications, and text with amazing detail.

Best Single-Cable Docking

Now, one compact port provides Thunderbolt 3 data transfer, support for two 4K 60 Hz displays, and quick notebook charging with a single cable. It's the most advanced and versatile USB-C docking solution available.

External Graphics

Gamers can now connect plug 'n' play external graphics to a notebook to enjoy the latest games at recommended or higher settings.

Thunderbolt™ Networking

Provides a peer-to-peer connection at 10 GbE speeds to quickly transfer files between computers, perform PC migrations, or set up small workgroups with shared storage.
