

# Intel® Celeron® Processor J1900, N2807 & N2930 for Internet of Things Platforms

Specification Update Addendum

---

*July 2017*

You may not use or facilitate the use of this document in connection with any infringement or other legal analysis concerning Intel products described herein. You agree to grant Intel a non-exclusive, royalty-free license to any patent claim thereafter drafted which includes subject matter disclosed herein

No license (express or implied, by estoppel or otherwise) to any intellectual property rights is granted by this document.

All information provided here is subject to change without notice. Contact your Intel representative to obtain the latest Intel product specifications and roadmaps.

The products described may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

Copies of documents which have an order number and are referenced in this document may be obtained by calling 1-800-548-4725 or by visiting: <http://www.intel.com/design/literature.htm>

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Learn more at <http://www.intel.com/> or from the OEM or retailer.

No computer system can be absolutely secure.

§

## Preface

---

This document is an update to the specifications in the following Affected Documents and Related Documents tables. It is a compilation of device and document errata, and specification clarifications and changes. This document is intended for hardware system manufacturers and software developers of applications, operating system, and tools.

Information types defined in the Nomenclature section of this document are consolidated into this update document and are no longer published in other documents. This document may also contain information that has not been previously published.

**Note:** This document is a supplement to the *Intel® Celeron® and Pentium® Processor N – and J – Series Specification Update*. The document contains specification updates unique to the implementation and operation of the Intel® Celeron® processors J1900, N2807 & N2930 in Internet of Things platforms.

### Affected Documents

Document Title	Document Number/Location
<i>Intel® Pentium® Processor N3500-series, J2850, J2900, and Intel® Celeron® Processor N2900-series, N2800-series, J1800-series, J1900, J1750 Datasheet</i>	329670

### Related Documents

Document Title	Document Number/Location
<i>Intel® Celeron® and Pentium® Processor N – and J – Series Specification Update</i>	329671

### Nomenclature

**Errata** are design defects or errors. Errata may cause the processor's behavior to deviate from published specifications. Hardware and software designed to be used with any given stepping must assume that all errata documented for that stepping are present on all devices.

**Specification Changes** are modifications to the current published specifications. These changes will be incorporated in the next release of the specifications.

**Specification Clarifications** describe a specification in greater detail or further highlight a specification's impact to a complex design situation. These clarifications will be incorporated in the next release of the specifications.

**Documentation Changes** include typos, errors, or omissions from the current published specifications. These changes will be incorporated in the next release of the specifications.

**Note:** Errata remain in the specification update throughout the product's lifecycle, or until a particular stepping is no longer commercially available. Under these circumstances, errata removed from the specification update are archived and available upon request. Specification changes, specification clarifications and documentation changes are removed from the specification update when the appropriate changes are made to the appropriate product specification or user documentation (datasheets, manuals, etc.).

## Summary Tables of Changes

---

The following table indicates the Specification Changes, Errata, Specification Clarifications or Documentation Changes, which apply to the listed processor steppings. Intel intends to fix some of the errata in a future stepping of the component, and to account for the other outstanding issues through documentation or Specification Changes as noted. This table uses the following notations:

### Codes Used in Summary Table

#### Stepping

X:	Erratum, Specification Change or Clarification that applies to this stepping.
(No mark) or (Blank Box):	This erratum is fixed in listed stepping or specification change does not apply to list stepping.

#### Status

Doc:	Document change or update that will be implemented.
Plan Fix:	This erratum may be fixed in a future stepping of the product.
Fixed:	This erratum has been previously fixed.
No Fix:	There are no plans to fix this erratum.

#### Row

Shaded:	This item is either new or modified from the previous version of the document.
---------	--

## Errata

Number	Status	Steppings			ERRATA
		B2	B3	C0	
VLP1	Plan Fix	X	X	X	System May Experience Inability to Boot or May Cease Operation

## SPECIFICATION CHANGES

Number	SPECIFICATION CHANGES
	There are no Specification Changes in this Specification Update revision.

## SPECIFICATION CLARIFICATIONS

Number	SPECIFICATION CLARIFICATIONS
	There are no Specification Clarifications in this Specification Update revision.

## DOCUMENTATION CHANGES

Number	DOCUMENTATION CHANGES
	There are no Documentation Changes in this Specification Update revision.

## Identification Information

### Component Identification via Programming Interface

The Intel® Celeron® processor J1900, N2807, and N2930 steppings can be identified by the following register contents:

**Table 1. Component Identification via Programming Interface**

Reserved	Extended Family	Extended Model	Reserved	Processor Type	Family Code	Model Number	Stepping ID
31:28	27:20	19:16	15:13	12	11:8	7:4	3:0
0000b	0000000b	0011b	000b	0b	0110b	0111b	B2/B3: 0011b C0: 0100b

**NOTES:**

1. The Extended Family, bits [27:20] are used in conjunction with the Family Code, specified in bits [11:8], to indicate whether the processor belongs to the Intel386™, Intel486™, Pentium®, Pentium® Pro, Pentium® 4, or Intel® Core™ processor family.
2. The Extended Model, bits [19:16] in conjunction with the Model Number, specified in bits [7:4], are used to identify the model of the processor within the processor's family.
3. The Processor Type, specified in bits [13:12] indicates whether the processor is an original OEM processor, an OverDrive processor, or a dual processor (capable of being used in a dual processor system).
4. The Family Code corresponds to bits [11:8] of the EDX register after RESET, bits [11:8] of the EAX register after the CPUID instruction is executed with 1 in the EAX register, and the generation field of the Device ID register, accessible through Boundary Scan.
5. The Model Number corresponds to bits [7:4] of the EDX register after RESET, bits [7:4] of the EAX register after the CPUID instruction is executed with 1 in the EAX register, and the model field of the Device ID register, accessible through Boundary Scan.
6. The Stepping ID in bits [3:0] indicates the revision number of that model. See Table 2 for the processor stepping ID number in the CPUID information.

When EAX is initialized to a value of 1, the CPUID instruction returns the Extended Family, Extended Model, Type, Family, Model, and Stepping value in the EAX register.

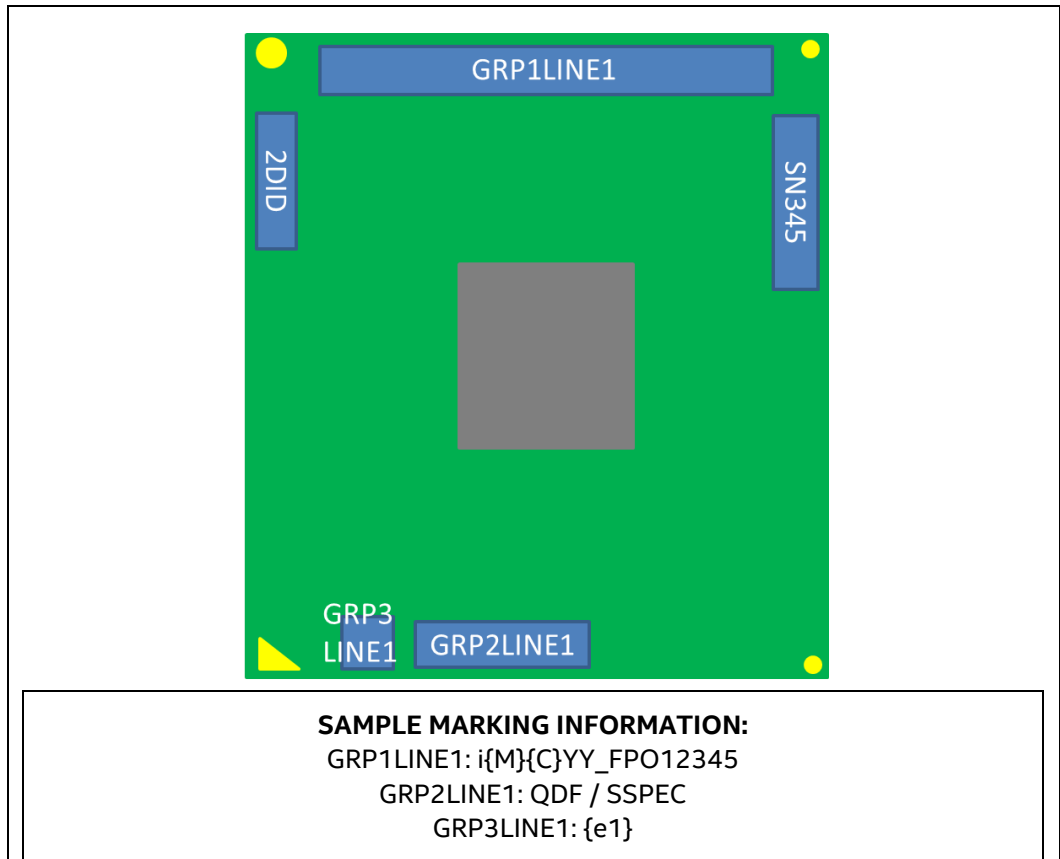

**Note:** The EDX processor signature value after reset is equivalent to the processor signature output value in the EAX register.

## Component Marking Information

The Intel® Celeron® processor J1900, N2807, and N2930 may be identified by the following component markings:

**Figure 1. Intel® Celeron® Processor J1900, N2807, and N2930 (Micro-FPBGA13) Markings**

**Table 2. Identification Table for Intel® Celeron® Processor J1900, N2807, and N2930**

QDF / S-Spec	MM#	Product Stepping	Processor #	CPUID	Core Speed		Package	Cache Size (KB)
					Highest Freq. Mode (HFM)/ Burst GHz	Lowest Freq. Mode (LFM) MHz		
SR1SC	932481	B3	J1900	30673	2.00/2.42 (B)	1333	Micro-FCBGA13	2 x1024
SR1UT	934010	C0	J1900	30678	2.00/2.42 (B)	1333	Micro-FCBGA13	2 x1024
SR1W3	934896	C0	N2930	30678	1.83/2.17 (B)	1333	Micro-FCBGA13	2 x1024
SR1W5	934898	C0	N2807	30678	1.58/2.17 (B)	1333	Micro-FCBGA13	1 x1024

**Identification Information**

**NOTE:** 'B' is the Intel® Burst Technology x.x (x.x is a placeholder for future versions) feature that is included in the Refresh SKU.

§

## Errata

---

### VLP1. System May Experience Inability to Boot or May Cease Operation

**Problem:** Under certain conditions where activity is high for several years the LPC, USB (low speed and full speed) and SD Card circuitry may stop functioning in the outer years of use.

**Implication:** LPC circuitry that stops functioning may cause operation to cease or inability to boot. SD Card or USB circuitry that stops functioning may cause SD Cards to be unrecognized or Low Speed or Full Speed USB devices to not function. Intel has only observed this behavior in simulation. Designs that implement the LPC interface at the 1.8V signal voltage are not affected by the LPC part of this erratum.

**Workaround:** Firmware code changes for LPC circuitry and mitigations for SD Card & USB circuitry have been identified and may be implemented for this erratum.

**Status:** For the steppings affected, see the *Summary Tables of Changes*.

§

## ***Specification Changes***

---

There are no Specification Changes in this Specification Update revision.

§

## ***Specification Clarifications***

---

There are no specification clarifications in this Specification Update revision.

§

## ***Documentation Changes***

---

There are no documentation changes in this Specification Update revision.
