

Your Privacy is Important to Intel

Privacy Notice

Intel collects facility physical access records generated by RFID badges. This data constitutes personal information for the purposes of this notice. Information collected is stored in Intel's security badge records system and used in the management of Intel's security operations, in support of legitimate business needs, and for business intelligence purposes, including facility utilization analysis. Only those persons directly involved in such activities are authorized to access the data stored in the security badge records system and its related records.

Intel may share this data with Intel Corporation in the US, with any Intel subsidiary worldwide, or with authorized third parties for investigative or security reasons. Intel only provides third parties with the minimum amount of personal information necessary to complete the requested service. Intel does not allow third parties to use personal information for a different purpose.

Intel uses a combination of physical, administrative, and technical safeguards to protect information from loss or misuse. Intel may share data stored in the badge records system in order to investigate, prevent, or take action regarding illegal activities, suspected fraud, violations of Intel's policies, and/or situations involving potential threats to the physical safety of any person, to Intel's assets, or as otherwise required and permitted by law.

You may request access and rectification of data collected by contacting your local badge office. Intel will only retain data to fulfill the purposes for which it was collected and in most cases for no longer than two years.

Corporate Security is creating a secure environment for Intel people and assets world-wide by delivering global expertise and innovative solutions to enable business success anytime, anywhere.
