Today’s News

1. First public disclosure on Intel’s next generation Intel® Atom™ platform, code-named Pine Trail
   Update on design wins, growth opportunities

2. Update on Moblin, and v2 beta being released and available for download today
   Including background on the project and exciting new user interface

Agenda

- Netbook/Nettop Market Overview
- Pine Trail Disclosure
- Moblin v2 Update
- Q&A

*Other names and brands may be claimed as the property of others. All dates, plans and features are preliminary and subject to change without notice.
Netbook/Nettop Market Overview

- Netbook and nettop categories firmly established, a lot of excitement and momentum

- Intel® Atom™ processor is processor of choice
  - Unprecedented ramp of tens of millions of units
  - Significant momentum and ecosystem support
  - Nearly 300 design wins across netbook and nettop segments

- Entering Next Phase:
  - Netbooks still a growth driver, opportunities untapped with large markets underserved
  - Strong year ahead for nettops with broad adoption expected
  - New Atom™ processor platform coming...

**Pine Trail Platform Disclosure**

**Pineview**

*Other names and brands may be claimed as the property of others. All dates, plans and features are preliminary and subject to change without notice.*

**Lower Platform BOM & Easier Design**
- 2-chip architecture enabling 4L PCB routing
- Fanless potential\(^1\) enabling reducing BOM
- Easier design with package area reduction

**Reduced Power**
- Energy efficient Intel® Atom™ microarchitecture
- Lower TDP - thinner form factors, fanless potential\(^1\)
- Avg power reduction - improved battery life

**Improved Performance**
- Higher processor performance
- Increased graphics performance
- Memory controller integrated with processor

**Pine Trail enables lower platform BOM, reduced power, and improved performance**

\(^1\) Fanless may require configuration tradeoffs depending on scenario power workload

Moblin Project - background

- Moblin is an optimized Linux operating system project that delivers a visually rich internet and media experience on Intel® Atom™ Processor based devices including MIDs, netbooks/nettops, in-vehicle infotainment, and embedded systems.

- Intel initiates Moblin.org
  - 2 H 2007

- Moblin-based MIDs in the market
  - 1 H 2008

- Moblin v2 alpha and beta releases expand community innovation
  - 2 H 2008

- Intel acquires OpenedHand, bringing Clutter based 3D UI to the Moblin project
  - 1 H 2009

- Moblin project hosting transitions to the Linux Foundation
  - 1 H 2009

*Other names and brands may be claimed as the property of others. All dates, plans and features are preliminary and subject to change without notice.
Moblin v2.0 Beta released today

- Optimized for Intel® Atom™ processor-based devices
  - Fast boot
  - Footprint
  - Battery life optimization
- Complete user interface for Intel® Atom™ processor-based netbooks and nettops now and extending to all Intel® Atom™ processor-based devices
- Broad ecosystem momentum

*Other names and brands may be claimed as the property of others. All dates, plans and features are preliminary and subject to change without notice.*
Moblin v2.0 Beta User Experience

- The M-zone replaces the desktop; it’s the entry point to the netbook and nettop
- Easy and personalized social networking
- Simplified internet and rich media consumption
- Customizable for OEMs and Service Providers

*Other names and brands may be claimed as the property of others. All dates, plans and features are preliminary and subject to change without notice.*
Moblin Ecosystem Momentum

*Other names and brands may be claimed as the property of others. All dates, plans and features are preliminary and subject to change without notice.

Linux OSVs will productize over the coming months
