

**FOR IMMEDIATE RELEASE**

**ZT Systems Announces Intel® Centrino® 2 processor technology-based Notebooks  
Enabling Advanced Mobile Digital Entertainment and Productivity**

**Secaucus, NJ — July 14, 2008** — ZT Systems today launched notebooks powered by new Intel® Centrino® 2 processor technology, bringing new levels of mobile entertainment, productivity and portability to customers' digital lifestyles. Featuring Intel's advanced mobile technologies including Intel® Core™ 2 Duo processors, new ZT Systems notebooks powered by this technology offer improved energy efficiency, increased performance, and enhanced wireless connectivity for users both at home and in the workplace.

"These new ZT notebooks leverage the power of Intel Centrino® 2 processor technology to improve the user's experience in terms of wireless networking and battery life," said Russell Carlisle, ZT Systems Vice President of Marketing. "For our customers, this means improved Windows Vista performance, increased productivity for small businesses, and an outstanding digital entertainment experience for home users, at great prices and in stylish form factors."

With Centrino®2 -based notebooks from ZT Systems, users can enjoy substantial advantages over notebooks of previous generations. Better mobility is available with up to 5x wireless performance and up to twice the previously achieved range with 802.11n technology. When enjoying digital entertainment or giving presentations, users benefit from the clear, sharp video playback enabled by Intel Centrino® 2 technology. And for the extended battery life that's critical to home users and business travelers alike, Centrino® 2-based ZT notebooks employ a range of new features to improve energy efficiency.

A leading North American PC manufacturer, ZT Systems provides computing solutions incorporating Intel's new technologies to a range of customers at attractive prices. "The Intel® Centrino® 2 processor technology featured in these new notebooks from ZT Systems is the premiere technology available in today's portable PCs," said Eric Thompson, Director, North America Channel and Distribution Sales & Marketing at Intel. "Mobile users who choose these new notebooks will appreciate the unrivaled performance of dual-core processing, plus enhanced freedom enabled by the advanced energy efficiency features.."

Notebooks from ZT Systems featuring Intel Centrino® 2® processor technology will be available for order beginning in late July 2008. To find out more about product availability and where to buy, visit [www.ZTSystems.com/centrino2](http://www.ZTSystems.com/centrino2).
